>Subject: UFO sighting in Ohio
>Date: Thu, 1 Sep 1994 19:44:39 GMT

According to the wire service, a teenage girl in Berlin Heights, Ohio has reported seeing a UFO with blinking lights near her home. Fifteen-year-old Carmen Utter watched it hover near her house for several hours from 10:30pm on August 29th until the early morning hours Tuesday. Her parents also saw the object and called the local sherrif's office in Erie County. Deputy Jeff Hippley, who had responded to the call, also saw the lights in the sky, according to his report. He is quoted as saying that he doubted that the object was from outerspace. He said the object was about 2 miles above the ground and was travelling west at a slow rate of speed. He lost contact with it at about 1:07am and said that it reminded him of a blimp.

>As we were standing there trying to figure it all out, two jets (F-15s, I
>think, with wings extended) roared slowly overhead in the direction of the
>Thing's disappearance...and roared back overhead ten minutes later.

Well, if you ever see an F-15 overhead *without* "wings extended",
then i'd say you had better find some cover fast, since it will be
making a big hole in the ground very soon! :>

>Obligatory Disclaimer: We have *no idea* what the Thing was. Our best guess
>is that it was some sort of drone/decoy/training balloon that the Air Force
>was using, but we couldn't figure out why they'd be doing that over a
>reasonably populated area...there are a couple of air bases thereabouts,
>though...Oh.

It could have been something like that which "got away"...

Subject: "Missing Time"?

To all.
This story may be of no value to the purpose of this newsgroup
but still I would like to share it with you.

My brother lives in Canada and he's about 35 years old. A
teacher, husband and father of 3 children. Each year at Chris-
tmastime he and his wife and children used to travel from
their hometown Barrhead (Alberta) to his wife's parents in

Abbotsford (B.C.). A 1100 kilometer journey. They left at 23.00 hours on monday 22 december 1991 driving a 'volkswagen, golf' which runs on diesel. It was partly cloudy wheather with a three-quarter moon. The lanscape was covered with snow but the road was clean. No other traffic on the road. They did not refuel their car. There should be enough until their first stop after a 3 hour drive in 'Hinten'. Unfortunately no station was open. So they decided to drive another hour to 'Jasper'. Arriving at about 3.00 am also no station was open selling diesel. They decided not to wait until 7.00 am but drive slowly to the next station at a distance of 120km. Saving fuel by driving 60/70km/H.
My brothers story:
'I look at my watch and it says 3.30 am. The next time I look at my watch it says 4.50 am. My wife was awake/sleeping in the front seat. The radio was off because of the children sleeping in the backseats. I looked again at my watch expecting to see something like 3.50 am but it really is 4.50 am. I can't remember having driven that long. As I check the fuel meter it's difficult to see how much fuel has been used, due to the slow driving speed. Looking at the kilometer-counter then it corresponds with a 1.20 hours drive at a 60/70km/H speed. (He did not tell how much kilometers he had driven). Later on I talked to my wife but she didn't remember anything strange happening during that night.'
My brother nor his wife did suffer from 'bad' dreams or something like that. He thinks that the 'lost time' is a result of a 'low conscious state of the mind' during driving in the night.

Well, that's his story. He also told me a friend of him had experienced the same thing years before. I probably will post it in another article.

My current opinion is that indeed people can drive miles and miles without remembering because they're thinking of something else. Maybe a kind of hypnotic state caused by looking at the moving road from the car's perspective. So I think no ufo encounter or abduction is involved.

Maybe somebody has likewise experiences?

Subject: Texas sighting..ages ago

While returning from vacation in California, driving across Texas just outside Big Springs, Texas on the way to Corpus Christi, I noticed 4 flying objects that appeared as "dimes" and silvery in color, heading SE. While viewing them I noticed that one of the 4 dissapeared vertically from sight. They (ufo's) were flying in formation. The time was a Sunday in 1954. The following Monday, I read in the paper that a family having a backyard barbeque in San Antonio reported 3 UFO's flying SE close to the

time that I first noticed them. In the same column, a man driving from Corpus Chrisi to Rockport report 3 UFO's flying SE in close formation.

This was summertime in 1954. I reported the incident to the paper on Tuesday, and it was printed in the same paper on Wednesday.

Years later I went to a local library and looked through the microfiche and could not locate the stories. The local paper was the Corpus Christi Callier or the Corpus Christi Times.

I had good eyesight in 1954. I guess I believed it was "flying saucers". It was a clear day.

So the question for me is...after 40 years...My second report of the incident. Go ahead - debunk it here, I don't mind at all.

Thanks and keep the group going.

Subject: Colorado UFO Report
Date: 19 Sep 1994 14:42:25 GMT
Summary: UFOs over Denver

>From the "denver Post" 9-4-94

"STNGE LIGHTS--
"More than 20 area residents claim to have seen strange lights and
"objects that change color in the Del Norte night sky above "D"
"mountain last week."
"Del Norte resident Mary Ann Jones said she and a friend saw a
"triangular-shaped honeycopb-like object in the sky around 11 p.m.
"last Sunday that "just disappeared" after they had been watching
"it for about an hour."
"One witness reported seeing two of the objects separate from the
"others and drift down to below cloud level."
"Another witness described one object as having twinkling blue and red
"lights around it."
"Alamosa County sheriff's deputies said they hadn't seen the objects."

Note
: The San Luis valley (Alamosa is the largest town in the valley)
is a UFO and cattle mutilation "hot spot" There was a big wave of
mutilations in 1993, and going back to 1967.

>From the ET lsitserv:

JADE DRAGONS AND AMBER TRIANGLES. (slightly edited and modified so as not
to offend ultra-rational sensibilities) ;)

(Near the Seven Sisters hills In Far North Qld) ....there have been UFO sightings in that vicinity. About six years ago I sighted a brilliant luminous green object moving in a horizontal path from west to east from the direction of these hills which were about three miles distant. It was in sight though a gap in the trees ahead on the straight highway for about 25 seconds. I was cruising south at about 40 mph so I could establish that it was fairly high up. It was nearing dusk and I took it for an especially brilliant light on a small aircraft at first, but realized it was far too bright for that. I concluded it was a satellite burning up....

"The Tablelander" of August 23 '94 reports: "Three Atherton family members have reported sightings which they describe as unidentified flying objects....(they)...spaced their sightings within three weeks... (the father)...spotted `a large bluish object' flying east towards the Seven Sisters hills. Days later...(the son) saw a similar object flying in the opposite direction....(the mother)..spotted a large green object flying close to their home....`What I saw was beautiful and green - the most magnificent, luminous green I have ever seen..."

I would describe the colour I saw as just like that, but still feel that what I saw was a satellite. Now there is skepticism for you.

The Chinese called them Jade Dragons and would assume as did many ancients that special children would emerge in the region during the years to come. "Children of Arcos" sounds so much nicer than "gene modification by flying saucers".

Not to be outdone, Southern Queensland has had its outbreak of UFO's, and quite clearly they are of a different type although it occurred at the same time.

The Brisbane daily, "The Courier Mail", reported on 30th Aug 1994:

"...A spate of unidentified flying object reports, accompanied by unexplained underground noises attributed by some to UFO's, have been reported from Coloundra to Gympie.

"Gympie is reported to have had 52 separate UFO sightings in the past 1O weeks and claims have been made that some residents of Marcoola Beach have left the area through fear of the undergound noises.

"The coodinator of a Gympie UFO Research Bureau, Carlo Riva, said: `"All the sightings were the same. The object was triangular with a central red-to-orange pulsating light.

"`One farmer said it came down to within 500 M of his property and lit up a ridge with its light.'

"Mr Riva said the sightings were similar to reports from Belgium and his group had sent reports of the Sunshine Coast sightings to NATO and the Belgium police....."

>Okay, folks, I'd like some imput on my story. This is what I saw:
>
>It's been years, so the details are fuzzy... I was about seven years
>old at the time. My parents had let me sit up late the night of the
>incident because there was supposed to be a meteor shower that night.
>Now, I was sitting in the dining room, looking out the window at the
>night sky. Suddenly, a meteor came shooting down into my back yard.
>Now, I call it a meteor, because that's what it looked like. It
>appeared to be a huge boulder, about 10 feet in diameter, solid
>rock, and it was totally engulfed in fire. Now, if it would have
>hit the ground, I would have been content to say it was a meteor,
>(if I'd have lived to tell the tale), but it didn't. It got 6 feet
>from the ground and just stopped. Now, I would make a random guess
>that it was hurling downwards at a speed no less than 90 mph, and
>when it got within a few feet of the ground, it just stopped. It
>stopped and hovered. Being a small child still, I was to shocked
>to say or do anything. I just sat there and stared at it. It sat
>in the middle of my back yard for about three minutes, stock still.
>Finally, it started moving. It accelerated at an incredible rate,
>straight towards me and the window where I was watching. It got
>about five feet from the house, then shot stright back up into
>the sky. As it passed my window, I felt the heat off of it and
>heard a sound likened to that of a huge bonfire.
>
>So whatcha think? Am I losing my mind, or is it gone already?
>
In response to an E-mail message I recieved, I am elaborating
further on my story. The incident happened in Bainbridge, Georgia,
the cite of the recent south Georgia flooding. To my knowledge, I
am the sole witness of the incident. I didn't talk to anyone about
it for a long time, so I am unsure. My parents were up at the time
of the incident, and I told them what happened the followin morning,
but they were so vehement in their disbelief of me that I dismissed
it. My parents were on the other side of the house watching tele-
vision, and witnessed none of it. I would say that the occurance
happened at approxamately 21:45 - 22:20 on a friday night. Like I said,
I was only six or seven, so the memory is not very clear on the small
details like what time... etc.

****

I am new to the net. I can barely get into e-mail, let alone send to an
alt.alien.whatever and do it anonymously. You seem to want some
information on sightings of aliens. I think I saw an alien about 2
years ago. I will explain.

I am a truck driver and drive the line board(western US)...I am out of
the SF Bay area. I was on a run From Richmond CA to Las Vegas NV.
Legally I can only drive for 10 hrs a day and work/drive for a total of 15
a day. I had to lay over at a motel Close to the Nevada/California state

line on I-15. This was a fairly new....large Motel. I was dead tired and after checking in.....took a shower and went to bed.

Usually when I am extreemley tired it is hard for me to get to sleep, so I masterbate. I then fall asleep imediatly.
About 45 minutes after falling asleep(I had a clock next to the bed) I woke up to find a woman standing next to my bed.

This woman was very tall(or was elevated in some way), very slim,had an olive and very wrinkled complexion. She either wore a black wig or had black hair. She had dark oriental type eyes. I was not startled, and actually felt like I knew her.....she looked as
if she was weary or sad.

She took out a clear glass or plastic popsicle stick and scraped it across my stomache.....I rolled over and went back to sleep.

I know this sounds odd but I can explain her appearance in more detail, if you are interested.

Date: 21 Sep 1994 15:59:53 GMT
Organization: Dartmouth College, Hanover, NH

Hi gang,
I'm new to this email group, and in browsing thru some of the older postings, I was reminded of two incidents in my life of possible UFO close encounters. These were both visual. Does that mean it's a Close Encounter of the First Kind? What are the others--anyone know?

Both incidents are clear to me, almost as if they happened yesterday.

The first one: I was at the local drive-in with my sister. (Note: Drive-in is in White River Jct., VT, on a hilltop, not the least bit remote. It's surrounded by hotels and other businesses. Also, it is located very close to a major intersection of two freeways) I can't recall the movie playing, or even if it was intermission. I was in the passanger seat. I'd say the date was the mid 70's or so. We noticed a commotion going on outside of the car. People were getting out of their cars and looking up. I rolled down my window, and what I saw made me get out of the car also, for a better look. A UFO was slowly making an approach to the Drive-In, right over the top of the screen. (No, they didn't stop for popcorn) It was large, circular or oval, had quite a few running lights around the edge and bottom. I seem to recall it wasn't smooth at all, and was about 3 stories tall. It was moving rather slow (perhaps 20 mph, if that) and passed right over the screen. Then, it shot straight up, as if the pilot suddenly realized that they were being observed by 75 or so folks.
The next day, in the local newspaper, was an article about a UFO sighting over the drive-in, and that the local airport hadn't picked anything up on radar. (Note: The airport is on an adgacent hilltop, almost visible from the drive-in).

Another incident, about in the early 80's, I'd say. I was driving alone in my car, on a small stretch of lonely road in Canaan, NH. Late at night, very clear sky. No moon, that I recall. I glanced out the passenger window, and was amazed to see what I thought was a shooting star. However, I've never seen a shooting star act like this one did. It was moving rapidly, and changing direction without slowing down. It moved in a decending manner, as if it was climbing down stairs.

```
 ________
                                                I
                                                ________
                                                        I

_______________
```

(Note: I am trying to demonstrate a staircase-type look. That is how it traveled, as if going down stairs.) Then, it was gone. I don't recall what direction it took off in. I was driving, so trying to watch the road at the same time. I told my immediate family of the incident, and was believed. My family is very open-minded about stuff like that. I know a helicopter is capable of such flight, but not at the speeds I saw.

Those are the 2 encounters that I recall.
On another note, about 10 yrs. or so ago, there was a fascinating write-up in the local paper (Valley News) about an incident that was on-going in Windsor, VT. (Windsor, WRJ, Canaan are all within a 1/2 hr. drive of each other.) Local authorities reported seeing strange lights in the sky, on a re-occuring basis, over the course of about a week. The local firechief had jokingly said he could set his watch by them, they were so regular to the area. Unfortunatly, I don't know any other details.

Now that I'm thinking about it, there was one other encounter. Neither I, nor any of my family, witnessed this. This event occured in Rumney, NH, a very small town, about 1/2 hour from Canaan. This event must have happened about the early 70's. My sister was attending Plymouth State College, near Rumney, and heard of the event. Apparently, there was a landing of a small craft, near the main road (Rte. 25). I don't remember if anyone witnessed it, but the ground was badly scorched where it landed. I remember that no vegitation grew there for years after (this I saw with my own eyes). To this day, 20 yrs later, you can still just barely see the area. The vegitation grew back, but it doesn't look right somehow. The wrong color, and...just doesn't look right.

Well, that's all I have to offer. If anyone cares to respond, please do so directly to me. I'd like your input, and to hear your true stories, be it personal, or second-hand.

P.S.
Communion is one of the scariest movies I've ever seen. Gave me nightmares of abductions. We'd be incredibly narrow-minded to think we're the only ones "out there". One thing that makes me nervous is

that we've been sending signals out into space. Damn...we will be easy to find. Let's hope we're not found by the wrong species!

Subject: Aurora Ohio sighting
Date: 25 Sep 1994 17:38:05 GMT

Hi Guys,
Yesterday Afternoon 9/24 about 3:30 edt me an my wife were cooking out and I saw what I thought was a small plane circling overhead.
But it wasn't flying like the small planes that I see around here all the time it was flying in tight circles overhead much tighter than any plane I seen before.
It didn't make any sound that I could hear. I thought it might be a bird or maybe a radio controled plane until directly above this aircraft I saw many tiny lights much higher up move around two sligtly brighter lights. The two brighter objects were traveling in a straight line but very slowly while the tiny lights seemed to "swarm" around the two other lights.
Shortly after I spotted the lights the plane like object disapeared
ANYONE KNOW WHAT THIS MAY HAVE BEEN?
Anyone know about an earlier post about sighings in Aurora heard on a news station in Erie Pa.?

****

Subject: Re: More info about Ohio sightings
Date: 26 Sep 1994 18:30:29 GMT

The Oberlin sighting could be reported to Rick Del'Aquilla, the MUFON State section director. Look for him in the Clv. phone book (his home phone #).
Regarding the Aurora, Ohio sightings, local news (TV8) reported them to be the Blockbuster Video blimp. I don"t know where they got their info. but it sounds reasonable. .Is there anybody out there who is a first hand witness?

****

Subject: Fireball Sighting in Washinton/Ore.
Date: 26 Sep 1994 15:23:21 -0700

This is just rumor, and apparently comes from KIRO radio in the Seattle area, but the report said there were numerous sightings of a fireball over southern Wash/Northern Ore Saturday night. I have contacted the UFO sighting hot-line and left a message requesting further information. If I get a call-back I will post the report. If anyone has further details on this incident, please enlighten us all.

****

Date: Thu, 22 Sep 94 06:20:00 +0000

I've just started reading this newsgroup today as a result of what I observed last Sunday night (9/18)... I'm hoping someone in this newsgroup might be able to help me come up with a logical explanation of what I saw.

I was sitting outside around 22:45 just looking at the Moon when I saw an object silhouetted in front of it. There was no sound or light coming from this object and as soon as it passed from in front of the moon, it was no longer visible. Although size is impossible to determine, my impression was that it was not close by... it seemed to be some miles away. It moved in a stright line from left to right at about 45 degrees lat. and crossed the face in 3/4 to 1 1/4 seconds. It was roughly triangular in shape and its size in relation to that of the Moon is best described as follows: If you let a U.S. 5 cent piece represent the moon, then the object I saw was roughly the same size as 1/2 of the triangle under the dome and above the columns on the reverse side.

I'd very much like to draw you a picture, but considering the limitations of this medium, I'll try to describe the shape as best I can. Visualize the Space Shuttle viewed from the side and shorten the mid section by 1/2. Now imagine the wings were hinged at the fuselage and were pushed up 90 degrees from normal so that the wingtips were pointing up... That's what it looked like. Sorry! This is the best description I am able to manage :-(...

After thinking about this since Sunday night, I've thought about and ruled out the following:

Bird
Commercial/Private Aircraft
Balloon

Anything in LEO or beyond would have to be _very_ large, so I've ruled that out as well...

I am an amateur astronomer and I've spent a lot of time observing the sky and I've never seen anything like this... Anyone have any ideas?

****

Subject: Re: Fireball Sighting in Washinton/Ore.
Date: Wed, 28 Sep 1994 18:53:56 GMT

I may have seen it.
It looked to me like a large meteor moving from
generally north to south. It was visible to me over about 45 degrees of arc.
I saw it directly over head and it went behind some trees at about 45 degrees
over the horizon. It was visible for maybe a second and a half or so.
Several sparks calved off of the main body as it travelled along. It
traveled in an arc slightly east of the Zenith almost directly overhead.
IT was white with a slight orange cast and very bright. The object
appeared to be maybe half the diameter of a pencil eraser when held at

arms length.

I am vague on the day. It seems to me I saw this on Monday night around midnight coming home from the airport.

I am not missing any time. I do not have any suspicious scars or warts.

****

Subject: Re: Fireball Sighting in Washinton/Ore.

: area, but the report said there were numerous sightings of a fireball

Could the sightings have been related to this one reported about 10 p.m. (PDT) Saturday 9/26 in San Francisco Bay Area? KCBS radio (San Francisco) said many callers and six airlines flying between S.F. Bay Area and Seattle reported a green light that appeared to fall NE of San Francisco, possibly near the Vacaville area. FAA said it was a meteor.

Subject: Brazil Sighting
Date: 28 Sep 1994 20:32:40 GMT

Back in the early '80s, I was working in the northern end of Brazil close to Fortaleza. One night while sitting outside my tent, I saw a couple of dots of lights moving in the sky. I called to my partner and he came out and we sat in lounge chairs watching the lights. We assumed they were Brazilian fighter jets on night manuevers. Till they were joined by a third light and started to exhibit non-ballistic motions. They would be traveling alongside each other and then Suddenly jet off at right (90 degree) angles. Then they would approach rapidly towards each other and veer off at the last moment. Sound familiar? We called the other navigation stations, seismographic exploration navigation beacons, and told them about the lights, on our radios. They went out and confirmed they saw these lights also. These stations were about 100 miles to the west and and southeast of our site along the coast. After about an hour of observing the lights, which seemed to twinkle colors at times, the lights seemed to combine for a few minutes and then split and streak off in different directions. Pretty vague encounter but it's mine and true.

****

Subject: Re: Brazil Sighting
Date: 30 Sep 1994 05:26:07 GMT

Here's my Brazilian sighting--my first of a UFO. Back in 1976 I was living on the Araguaia River (actually -- on a boat) in Central Brazil, many many miles from any airfield or town. I was fishing with friends one night about 9:00 when they told me to look up and I saw a glowing globe of light slowly crossing the sky. I said it was a satellite even

though it seemed too big; they told me "no" it was not a satellite; they had seen them often before.
When it had crossed the sky and had started down toward the horizon it stopped for a couple of minutes; it then made a falling leaf motion back in the direction from whence it had come and started back across the sky. Suddenly some friends called to us from another boat. I looked away for just a couple of seconds; when I looked back up to the sky nothing was moving. The light was gone. When I tried to discuss this later with my friends (local people) they would not discuss it; just shook their heads. I was confused because I had never given serious credence to UFO reports. It was several years before I fully accepted that it was truly something inexplicable.

****

Subject: 1992 Sighting On Long Island
Date: 30 Sep 1994 05:41:41 GMT

24 November 1992, Suffolk County, Long Island, New York, USA:

Passing motorists and area residents saw what they believed was a plane going down in a local park (Southhaven), accompanied by loud rumbling sounds and strange lights. Local fire departments responded to the crash, but were turned away by police who stated that the situation was being handled by the nearby (federally-controlled) Brookhaven National Laboratory's fire department.

For several days after the crash, there were numerous military helicopters seen over the park. Area residents endured unpredictable surges in their electrical power and phones that rang with no one on the other end. After nearly a week, UFO researchers were able to gain admittance to the park. They found abnormal levels of radiation, burned patches, twisted trees, and an area of earth that looked like it had been plowed over by heavy machinery. The nearest metallic fence had been stripped of its natural magnetic charge.

Police officers asking not to be identified confirm that a metallic object was recovered. Photograph evidence exists, taken by a dangerously curious local resident, but it is not clear what the photos show.

This event was not reported in any of the large local newspapers (Newsday and the New York Times are both based within 70 miles), nor was it reported on local radio or TV stations. The official record is that the park was closed from 24 to 28 November because it was being reserved for duck hunting.

Date: Tue, 4 Oct 1994 06:24:24 GMT
>From Conference : 0042 - Beyond
Forwarded on : Monday, October 3, 1994, at 11:49

Hi,

I've been monitoring this conference for a year, and did only for entertainment. But, after the last few months here in south Ms., I have reconsidered letting you people know that strange stuff is happening here as well as all over the world.
Last July at our Radio control model airfield, myself and four other friends plus two local police who stop in an watch regularly saw a round metallic object drifting eastbound with the wind at a very high altitude right over our field. I have a commercial pilots certificate and told them it was weather balloon drifting with the wind. After about five minutes while flying again the object reappeared coming back upwind toward us. It descended at a high rate, and stop as if it were a dart hitting the dart board. By this time I was trying to land my plane so I could see what was happening and was only able to see it intermittently while everyone was getting vocal about this object. By the time I landed, it was gone, but did see it. Other friends said it would dart at right angles, went into a cloud and disappeared.
We all stood in silence for a minute, then began to ask each other what each other had seen, I guess to make sure we witness what was until this time, a not to serious subject. Only one of us got upset about it... He was a Vietnam vet that was under some serious thought...Anyway we all packed up an went home.
The next day all I could do was to go outside an scan the sky every chance that I could. At about the same time as the day before(1:30 pm) I was out in my front yard and looked up and I witness a chevron shape (boomerang) object moving across the sky at the speed of an airliner, as it got over my house, it done a 360'circle.. while doing the circle...it proceeded to do pirouettes in the opposite direction ..... then continued on its westbound course for second, then went into hyperdrive and disappeared before my eyes.
No reports from anyone else, not even the media. Even the two policeman did not bother to report it.
About two weeks ago, on a Sunday night, a family in the Sumerall area got video of two round pulsating lighted objects that where hovering in the trees near their home. It was shown on the local tv news, but I have not heard anything since.
I cant tell you to much about the chevron shaped object, but the round ones look just like the one that were film in Mexico City during the last eclipses. Wither they are of(skunk works) military or of alien origin, it seems something is going on.

Subject: Re: Brilliant object seen over Manitoba
Date: 4 Oct 1994 21:55:09 GMT

In article <36sbho$l95@canopus.cc.umanitoba.ca> rutkows@cc.umanitoba.ca (Chris Rutkowski) writes:
>I've received several reports concerning a brilliant fireball or bolide
>seen today (4 October 1994) at about 0650 local (1250Z). Observers were
>scattered throughout southern Manitoba.

Although I personally never saw the fireball, a few of my collegues witnessed the event
around 6:50am this morning (Oct 4th). They stated similiar observations as to what Chris
wrote in his post, with the object flying south of Winnipeg very fast and almost horizontal to

the horizon. It was similiar in color as a magnesium flare and seemed to burn itself out.
My friend saw the object for approximately 3 or 4 seconds before it seemed to disappear.

Subject: My Own Siting
Date: 6 Oct 1994 14:48:30 GMT

I may be crazy for posting this, but I may have witnessed a "siting" of an object in the air. I'm assuming that it is just an anomaly in the air, that is, a cloud formation or whatever. I spotted it during an air show about a month ago in Toronto. I was watching jets go by with a pair of strong binoculars, when, (by pure luck) I caught something at the corner of my eye. I say "by luck" because this object was white and partially hidden by a cloud and all the smoke those jets and planes were generating. Anyways, I decided to stare at this thing for while thinking what a strange cloud formation it was. It was circular in shape but hollow like a donut. My first thought was that it WAS a cloud, but the strange thing was that it did not move with the other clouds and its shape stayed fixed. Also, it seemed like it was moving against the wind (I may be wrong, since relative speeds are hard to judge through binoculars). At any rate, it wasn't moving WITH the clouds. I'm, not a good judge in distance (especially through binoculars) but my best guess is that it was a good 15-20 km from my position. I didn't expect anyone else to see it since I did lose sight of it once and took me some time to find it again. But I DID expect those high-tech planes to detect it on their radar or something. I guess there wasn't anything really there. After about 7 minutes of whipping around in the sky, it disappeared in the clouds and I never saw it again. Most likely I was just seeing things, but I'd just thought I'd put my 2 cents in. Anyone else see anything in that area at that time (Toronto, Canada @ Sept 2 /94) ?

Subject: Oregon UFO

Date: Fri, 14 Oct 1994 03:12:57 GMT

I was in Clackamas County, Oregon on 9/1/93 at 1:00am in the high Cascade Mountains, (around 5,000 feet up), at a remote area in the county's SE corner, with my girlfriend.

(if you really want to go there, I'll tell exactly where you by email privately)

I had returned to a geographic area I had traversed one month earlier, at around the same time of night (1:00am) as my visit one month prior.

A strange smell I had smelled the last time had provoked my curiosity about this place at around 1am in the morning. What had happened was this: We were driving along, at about 15 mph, and an indescribable smell (pungency of a skunk, the drug smell of opium, an animal smell, clearly) suddenly appeared, and we stopped the vehicle we were driving. After smelling the smell, for about 10 seconds, my girlfriend promptly went to sleep in the back seat for 30 minutes.

After about 10 minutes the smell disappeared, 20 minute later she awoke. I was very scared the whole time. I felt what I would describe as extremely creepy feelings, someone watching me, but I thought it could be my imagination. After I left the area, Indian friends told me that 100 year old Yakama Indian legends in the area tell of Bigfoot, you know, Sasquatch, inducing "sleep"just like this, and smelling uniquely bad.

So, We were curious, we went back to see what w could see, 1 month later. Visibility was excellent on the night of our second visit to the area, and we were parked on a different one lane logging road at about the 5,000 foot level on a mountain ridge in the Cascade Mts., in a very remote area, overlooking a valley. Facing north... For an hour the only light we saw was the moon in the sky. Then we saw what we thought was a campfire igniting, about a half-mile across a narrow valley from us, on the opposite tree-covered side, slightly below us. We already had binoculars out, because we were looking at the planets, (and were ready to see "Bigfoot" too) and looking around at the mountainous terrain in the moonlight with them. As we looked at the amber-colored "campfire" across from us with binoculars, it rose up over the trees, and we could see that it was shaped like an ice-cream cone lying on its side. The ice-cream cone started blinking extremely rapidly, blue and red light that could be seen along with the amber and white light. On the left-hand side, an amber hemisphere or half-sphere began to glow brighter and brighter and looked like some sort of Star-Trek light-drive device..

After ten seconds or so there was a burst of light, and in under one second, the object traveled in an arc to a point we could still see on the horizon, leaving an amber light trail shaped like a rainbow, in the sky...that faded after another second. The object appeared to have a curved flight path to us, a parabolic arc across the sky.

We could still see the distant blinking object on the horizon from our 5,000 ft high vantage point on the logging road. We guessed it was 100 miles away or so. We couldn't really tell.

My girlfriend pointed out to me that when we first saw it, it was next to us, below us on the opposite valley wall, on the ground. ("next to" really means about a 1/4 mile across and down from us).

When we last saw it, it was on the horizon, far, far away, and at the most 15 seconds of time had passed from the beginning to the end of our experience.

Our repressive mechanisms had trouble with this experience. We decided to wait until the following morning, then go over to where we saw "it" take-off from, and see what we could see. I joked that maybe they were talking to Bigfoot.

We went to the exact spot it took off from.

When we got there around 8am the next morning, there was a federal-looking four door sedan, with three people, one woman, two men, all in suits, all with sunglasses, and with spit-shined black shoes. It looked just like a scene from the "X-files", just like a movie set. about the MIBs or something. Still, we decided not to stop and talk with them, trying to look dumb, we waved and drove on.

Summary:

I saw a vehicle with a propulsion system I didn't recognize, near where I had encountered a smell that I thought was Bigfoot, and then I found government people where the vehicle took off from.

Date: Thu, 20 Oct 1994 02:19:54 -0400 (EDT)

When I was a kid, I went to this summer camp in the mountains of North Carolina. Camp Rockmont for (rich) Boys, Black Mountain, N. C. Later I was a counselor there. The camp is situated mid way in a valley that runs roughly north-south. Going north, you have the camp. Next, you have land operated by a very large quarry. That runs north to this reservoir, and then the Pisgah National Forest starts. The north end of the valley is about 6 miles from the camp, and is made up of a very large range of mountains (5000-6000 ft. Hey, it's the Appalachians.) running east-west. To the immediate left of the camp (Part is actually camp property.) a group of mountains runs north-south to the national forest range. Across the valley from the camp is a low mountain called "The Saddle" and behind it, another group of mountains called "The Seven Brothers" that run north-south on that side. Basically, the valley is a rectangle about 10 miles long. No horizon. One night, I and about 4 or 5 other campers were messing about at dusk. I was about 14 at the time. It wasn't quite dark, yet. About the same time that you can see Venus, but nothing else. We

could, in fact, see Venus.(I think it was Venus. It was further to the east, and greenish.) High in the sky to the north, we could see 4 very bright, white stationary objects. For all practicle purposes, they were oriented like the "cup" stars of the Big Dipper. That's what we thought they were, but they were the only things visible in the sky and attracted our attention. We just sat there, watching these stationary objects for about 5-10 minutes. It got progressively darker. When it got dark enough that the other stars started appearing, the objects did something really, really strange. They started to turn in unison, couterclockwise, maintaining a uniform distance as they rotated. It took about thirty seconds for a rotation, and they did it three times. The color was primarily white, but they seemed to flicker red and blue occasionally. After the third rotation, the objects moved "inwards", or towards the center. Once there, they seemed to revolve around one another, then they each "shot off" in a different direction, faster than I think anything should fly, and seemingly a little bit wobbly until they were out of sight.. We were all very excited at first, and we started looking for a counselor to tell. But I don't know, something happened. I started not wanting to tell anybody, because I knew that they wouldn't believe me. I didn't say anything. One of the guys told a counselor, and the counselor said,"Well, it was probably an airplane." And that was that. After 14 years, this is the first time I've written it down. Anyway, that's it. Nothing monumental, perhaps not even worth mentioning. But nothing that I know of has that kind of flight characteristic, and I know that I saw it. That's largely the reason for my interest in this field.

Nothing monumental, perhaps not even worth mentioning. But nothing that I know of has that kind of flight characteristic, and I know that I saw it. I've considered as many explainations as I could. Lights reflecting off of clouds from either the valley or the Blue Ridge Parkway is not likely. The sky was a perfectly clear, cloudless. There wasn't even that haze that's associated with the Blue Ridge Mountains. On days like that you could see cars moving on the Parkway, but it wasn't that because the lights appeared well above the mountains. Anyway, that's it. Comments are welcome.

Subject: Scottish UFO Sighting
Date: 2 Nov 1994 16:01:16 GMT

Bonnybridge Sightings
The following report is from the Sunday Post (a traditional, "family" Scottish newspaper), dated 30 October, 1994.

UFO mystery in "Falkirk triangle"

A spate of UFO sightings in Central Scotland last week has baffled locals and experts alike.

Seven people claim to have seen unidentified flying objects over the Falkirk area.

On Friday morning three cleaners at the Union Chemical factory in Carronshore saw five UFO's as they walked to work.

One of the cleaners, Beatrice Campbell, from Carronshore, said, "We first noticed them at 5.40 a.m. There was one large object which had a light orange glow. The four smaller ones sparkled on and off like stars."

"To begin with, all were stationary. Then the large object began sending beams of light to the smaller ones. Then one of the small ones began moving off towards Falkirk. At that point my flesh started crawling."

The ladies went into the factory to start their shift and told lab manager Bill Downie what they had seen. He had them draw a diagram and make a written statement of the sighting.

When word of their experience spread, several more employees approached Mr Downie with similar stories.

Diane Keating, from Camelon, a packer at the factory, also made a written statement describing what she saw.

She said, "On Wednesday evening at around 7.00 pm I was looking out of a window at home when I saw an object in the sky."

"It looked reddish in colour, shaped like a ball, surrounded by a heat haze. It hovered for about 10 minutes, disappeared from view for two minutes then came back. At first I thought it was a plane. But it couldn't have been. I saw a plane fly under it."

At the same time on Wednesday, factory workers Steve Leishman and Kevin Carmichael, were walking to Steve's house in nearby Stenhousemuir. Mr Leishman, said, "We first saw an object which looked as if it was above the Denny-Stirling area. "It had a bright white colour. It moved away in the direction of Callander then came back and began to glow red orange."

"It was going really fast. We saw a passenger plane with it's landing lights on underneath it. The object was very much faster than the plane."

Another factory employee reported a sighting but wishes to remain anonymous.

Central Strathclyde Police, RAF Pitreavie and the Scottish Air Traffic Control Centre at Prestwick say they've not received any reports of the sightings.

Mark Macauley of the Royal Observatory in Edinburgh commented, "From what you have described the sightings don't correspond to astronomical objects like meteors, planets or communication satellites."

As all of these reports emanate from employees of the same factory, it seems reasonable to assume that there were other witnesses, particularly in respect of the 7.00 p.m. sighting. Hopefully, further witnesses may come forward following this article.

It would of course be particularly interesting to hear from someone who was in the plane which passed underneath the object.

If only.

There is a lot more to these reports than may be first apparent.

The incident reported by the cleaners is the first I can recall where a larger object is seen to send beams of light to smaller objects and may be unique in this respect. Unless of course someone knows otherwise...

There seems to have been a marked change in recent years in the type of sightings reported. The archetypical "saucer shaped" craft seems to be have been replaced to a large extent by orange/fireball UFO's and the second sighting reported in the article is typical of such reports.

What is particularly significant about these sightings is the area in which they reportedly occurred. On Friday 4 November, the second program in a series entitled, "Strange But True" will be shown in the U.K. on the ITV network. This program concerns "A Scottish town where 800 UFO sightings have been reported over the past few years".

The name of that town is Bonnybridge.

Going back to the above article, it mentions the towns of Carronshore, Falkirk and Denny. These are all situated within a small area, south of Stirling. In the middle of this area is another town...Bonnybridge.

Incidently, the description that the four smaller UFO's, "sparkled on and off like stars", sounds identical to some lengthy camcorder footage in "A Strange Harvest 1993".

Subject: Unusual experience in 1991
Date: 3 Nov 1994 08:05:51 GMT

This happened a while back, on the morning of February 14, 1991. I'm not sure what happened but has anyone else seen/heard anything like this? The location was a small hunting lodge just N of Libau, Manitoba by about 15km's. It was I think 02h00 or so (this was a few years back). The cabin has large bay windows that face N onto a marsh just S of Lake Winnipeg. The road winds in front of the cabin off to the W and meets the main dirt road maybe 100m from the cabin that is orientated N/S. I was in bed while my friends were sitting in front of the fire looking out the window. I had previously turned off all the lights to take some astro photography so aside from the fire there wasn't any light. I'm pretty sure it was a new moon (as I checked later). It had been snowing earlier and there was quite a howling wind. The lower NW portion of sky had been clear since we'd noticed the aurora in that direction. At either 01h00 or 02h00 my friends asked me how bright the moon was. At this point I woke up and looked outside. The entire cabin and surrounding area was bathed in a particularly brilliant white light; akin to the burning of magnesium in purity. The light was coming from the W. Unfortunately all the windows on that side of the cabin were iced over so all I could see was a round bright spot that I believe was somewhat larger than the full moon (if I recall correctly). I wasn't too sure

what was going on at this point although we could see inside the cabin itself quite clearly since the light outside was very bright. In retrospect I'm kicking myself because I didn't take a picture of anything to at least gauge the shadows to formulate a potential position of the light source. We stepped outside via the E entrance (the only door to lead outside) and were in the shadow of the house. As I was admiring how nice the trees looked to the E one of my friends was stepping down and going to come out of the shadow of the house. A step before he came out of shadow the light 'left'. From my perspective it shifted (almost straffed as I would describe it) to the S and then disappeared leaving the three of us in darkness. The whole experience lasted less than five minutes (possibly even less than 60 seconds). We're still at a loss to explain it.

In general; querying a relative who works at Winnipeg International Airport revealed no unusual radar contacts during that time period (although the previous week they had some 'weird things'(?) going on). It's possible it was some poachers along the road with a large spotlight looking for deer, and that their departure was coincident with my friend's attempt to see the light. However vague impressions of the angle of the shadows seemed to indicate the light source was a modest distance off the ground. The light source did not appear to grow in the time I attempted to scrape off the frost covered window to look at it; I think this rules out an airplane. If it had been a helicopter we should have heard it since the wind was from that direction as well. The light itself seemed to be extremely bright, particularly if it was situated 100m away. Granted they have bright lights at the Stadium, however this was a single source. I half heartedly gave some info to the local Museum of Man & Nature Planetarium section who in turn said that it had been pretty quiet during that time and no one else had seen anything for a while.

So anyways that's it. I think I'm more annoyed at the fact that I'll probably never know what it really was than the rather sleepless night we spent afterward after having been spooked. :-) Anyone else seen or heard anything similiar? Possible explanations?

****

Subject: Triangular UFO sighting
Date: Fri, 4 Nov 94 20:07:07 GMT

In the summer of 1975, I saw a pair of triangular objects while stargazing with binoculars. At the time, I assumed that they must have been aircraft. But it's been a long time since then, and I haven't ever seen any airplanes, or whatever, that even remotely resemble the objects I saw.

I have just recently gained access to the Web, and being amused by UFO stories, I found my way to a couple of the UFO pages. While browsing at Rutgers, I ran across some reports of "triangular UFO's", which made my hair stand on end. Here's what I saw in late August, 1975 while I was in the backyard of my house in Campbell, CA (South SF Bay area).

I was laying on the ground, looking through a pair of 20 power binoculars. My feet were pointed east, and the binoculars were pointed slightly to the right of straight up, at about the one o'clock position. Something went through my field of vision, moving right to left. I caught up to it quickly, and saw two objects flying in close formation, one in front, and the other behind, and to the right. They were both the same size, shaped like equilateral triangles with straight edges, flying point forward. Their color appeared to be flat slate gray, against a deep black sky. There were no features, and I saw no lights, or glow of any kind. They appeared to be illuminated by the city lights. It looked something like this:

```
            left (north)
                 -                       .if this diagram doesn't
          -             -                .line up, select a fixed
        -                 -             .font (like courier). This
      -                     -           .line should be straight.
    -       .                 -         .
   -       / \                 -        .
  -       /   \                 -       .
 -       /     \                -       .
 -      /       \               -       . I've draw this sideways
 -     /_________\              -       . because it was a little
-                   .            -  top . easier, and the proportions
-                  / \           -(west). are more accurate.
-                 /   \          -      .
 -               /     \        -       .
 -              /       \       -       .
 -             /_________\      -       .
  -                            -        .
   -                          -         .
      -                     -           .
        -                 -             .
          -             -               .
                 -                       .
             right (south)
```

There was something very peculiar about the way they looked as they flew. The craft in front appeared more steady than the trailing one, and the distance between them fluctuated randomly, varying from nearly touching, to a maximum of a triangle length. When the rear one began to lag, it would suddenly snap back to a comfortable distance from the front one. My impression was, that it looked as though they were being manually controlled by pilots, and as if they had very high power to weight ratio, and like they were somewhat hard to control.

I watched them for about 8 to 12 seconds. During that time, they maintained a due north heading, and covered about 80 to 90 degrees of azimuth. After I lost sight of them, I waited for several minutes for any sound. I heard nothing.

The binoculars were 20x50, with a field of view of 157 feet at 1000 yards. If you assume that the objects were about 100 feet long, and took up about 1/3 of the field of view, then their altitude would be 2000 yards, or 6000 feet, and their speed would be 568 mph. That seems pretty conventional, but I think I would have heard jets at that altitude. Furthermore, what jets have a perfect equilateral silhouette? The closest thing I can think of, is the B58 Hustler. But my view was clear enough, that I could have seen the little bit of fuselage in the front and back of the delta wing.

I probably blew the simple geometry I used for the altitude and speed calculations, but I've given enough facts that one could calculate height and speed for any craft of a known size.

****

Date: Mon, 7 Nov 1994 08:53:42 -0500

1- Remember those fireballs of late spring? I recall there were several (2-3?) on the same night. Well, I was the very lucky witness to the green one at 10:10pm. I remember it being on a Thursday, May or April. Really not too sure of the month but, funnily enough, I could get you the exact date because 2 other UFO SIG people saw the orange or the green one as well. Guess us ufo noids keep our eyes in the sky... or would that be "heads in the clouds".... ;P

Anyways, don't know why I remember it being on a Thursday night but I'm within ten minutes max. of the time. When I was living downtown I would leave for work at 10pm. I got onto the Queensway going west. I seen it at the Carling off ramp, about 10 minutes away. It was incredible Chris, right in front of me, and yes, I realize it was hundreds if not thousands of miles away... Right at about a 45 degree angle above me from looking straight ahead, was a sparkling aqua green fireball! It was HUGE! I even DUCKED my head 'cause it startled me so and I swear I could even hear spark-like sounds, though I realize it was just the imagination on overdrive ie: looked like a massive roman candle. Man, it was the most beautiful natural phenomina I have ever seen. It looked like it could have landed 5 miles away... right on top of the Citizen building on Baxter! ;}

So, mine was the green one, between 10:10 and 10:25 pm on a Thursday night. It lasted for approx. 1 second., could be half a second. A beautiful aqua green colour, lots of sparks, and shot straight down... no apparent arc to the trajectory... as if a massive roman candle had been dropped from a hot air balloon.

Ok, so was this what they call a "fireball" ? Never understood this classification. I have seen plenty of distant white meteors but this meteorite was soooo close and soooo colourful and seemingly noisy! Is a fireball a meteorite that happened to burn for a longer period of time? Or, maybe meteorites which come relatively close to a witness all look like this before hitting the ground. Dunno.... but I'll take one meteorite sighting (if they're what you call a fireball) over ever seeing

a meteor again! An awesome display of natural beauty to say the least!

Nov. 9/1987 U.F.O. experience 19:50, Ottawa, Ontario, Canada

O.K. it was November 9,87, and I was on my way to a concert with a friend. I was no more than 3 or 4 min from my house, when 4 or 5 white lights came across the river at me from the area of the parliament buildings. I was already thinking this was gonna be the best night of my life, because I was going to see my favourite artist Roger Waters...a long wait from 1978 when I first listened to Pink Floyd (of which he wrote all the music for) ...anyway my friend who I had really just met that day was looking at the road and I was driving when I looked to my left (over the river at the parliament bldgs area (from waterfront park)) and saw these 4 or 5 lights. They came right at my truck, met me head on and followed me down the road. One hovered over me which was now a white rectangele. I could faintly see the shadow of the light trailing up the underside of the craft.

It hovered over my moving truck for a couple of minutes, and I roled down my window to get a better look..I never once thought of stopping to get out and look more closely. It joined another one to my left and was circled about 10 times quickly.

The two on my right were circling each other also...while traveling at my speed. All of them were then on our right. THey went off up the road a bit, just far enough to get a good look at. I came to a red light and stopped. So did they! The light changed to green, I floored it , but they were accelerating at the same rate. Eventually they went off in a spiral above my old high school (Woodroffe)

The whole thing took about 10 minutes, no sounds, smells..no way humans could withstand those circles...

I found out the next day, a guy in my class was walking in the area and saw

something too.
It was really a beautiful experience.

The next day the friend and I looked for landing places...just for fun, and found an astronomical observatory of sorts out near Kanata. The only place we really
very tired

the shadow of the light on the craft appeared to make it look bigger, perhaps the size of a bus, but roundish.....the rectangular light was approx. half the size of say a hmmmmm well I'd say 6 ft by 3.5 ft or therebouts...
I'm always so tired when I get on the net....doesn;t help my grammar any!
I can only remember one other car on the road, it was a woman driving,and a male passenger I think. I was looking at her, and looking at the lights above us and wondering why she couldn;t see it, but not motioning at it with more than my eyes..... This is very upsetting, I feel there are portions of this experience that do not make sense! HOw could they have been just above with that car not seeing? When I see the car in memory, I can;'t remember what the ufos were doing. I should really have a long discussion about this kind of thing with my friend who was with me.

UFO SIGHTING.

SUBJECTS REPORTS SEEING A LIGHT IN THE SKY HOVERING OVER HWY. # THREE APPROX. 5 TO 8 KMS WEST OF BELBUTTE SASK. HE WAS IN HIS CAR GOING WEST AT ABOUT 100 KMS PER HOUR. THERE WAS ANOTHER CAR ABOUT 1/2 A KM. AHEAD OF HIM. HE HAD THE LIGHT IN SIGHT FOR ABOUT 4 KMS. HE DESCRIBES IT AS A WHITE LIGHT ABOUT 2 FEET ACROSS. IT HOVERED OVER THE VEHICLE AHEAD OF HIM. AT FIRST HE BELIEVED THE LIGHT WAS THAT FROM AN ONCOMING VEHICLE HOWEVER IT NEVER HOT ANY CLOSER. AT ONE POINT IT WENT HIGH UP IN THE AIR AND HE THOUGHT THAT IT MAY HAVE BEEN A VEHICLE UP ON A HIGH HILL HOWEVER THERE ARE NO HILLS AT THAT POINT. THE LIGHT HOVERED ABOVE THE VEHICLE IN FRONT OF HIM. FROM TIME TO TIME IT WOULD WOBBLE FROM SIDE TO SIDE. THE LIGHT MAINTAINED A CONSTANT INTENSITY. NO COLOUR (WHITE LIGHT). HE SAW THE LIGHT FOR ABOUT 3 OR 4 MINUTES. THIS WAS AT 2000 HRS ON SATURDAY 94-10-01. ANY OTHER WITNESS ARE UNKNOWN. IT WAS CLOUDY AT THE TIME. HE IS CERTAIN THAT THE LIGHT WAS NOT GLARE.

REPORT # 5

DATE: 1994 07 21 @ 1400 hrs
LOCATION: Taharti Lake in Quesnel B.C. area
DURATION: 3 minutes
DESCRIPTION: Translucent, size of a car, oval shaped, no sound at all. appeared to be 1/2 km from observers.
CONDITIONS: Clear sky, excellent visibility
WITNESSES: 5, names blacked out
COMMENTS: (from **** report) ("...") indicates letters missing, poor copy
Be advised that the above noted subjects were the only ones who actually observed the object however three more people were present at the cabin when this event took place. Other than the visual occurrence the other three people as we...s the stated report that upon leaving the area to return to their homes they realized that they all lost a day, eg, two of the people headed home on the 22nd of July when they got home it was the 23rd. Same as for the other three who left on the 23rd of July only to find on the way home by radio information in the ... (car?) that it was the 24th. Did not seem relevent at time till they realized it had occurred to all five of the people. Also be advised that during the sighting of the object the subjects state that it was following three water bomber planes ...en the planes pulled away from the object leaving it to hover for some time ... (over?) the lake moving slowly downwards after a few moments it left at a high rate of speed towards the east without any noise.

Police report and statement of observers to follow along with names and address of all subjects involved.

-------- end of report --------

(I do not have a copy of the full statement referred to above nor names of the witnesses).

**** Parksville **********: file no: 94-**** date: 94-08-10
occurrence no: 94-****
. **** tel: 248-****

(**** report includes photocopy from topographical map indicating location of sighting)

COMMENTS: (from first page of witness statement, Aug. 4 / 94, report)

..... 3 twin engine planes were flying over the lake when he noticed along with other witnesses - that a translucent object - size of a car was following them - the object slowed & hovered over the lake as the planes

flew away. then the object flew off towards the east at a high rate of speed. All the people staying at the cabin on this weekend seem to have lost a day - eg: left on what they thought was the 21st. when they got into town it was the 22nd. The group left at two separate days & both groups had this occur.

Date: Mon, 21 Nov 1994 17:57:39 GMT

Below is transcribed an article appearing in the "Country Roads Magazine" issue of Summer 1993, Vol 5 No 17. This magazine is included as an insert in the "Ottawa Citizen", an Ottawa, Canada newspaper.

Strange Sightings
by Bob Graham

Strange objects in the night sky and unexplained circles on the ground have been as much a part of Ottawa Valley lore as the tales of Joe Monteferand and other kings of the forest - and for just about as long.

Winnie Bennet, 82, tells a story her mother told all her life. Sometime before 1889, before she was married, Winnie's mother lived at home in a large stone house just south of the village of Forester's Falls. One evening the family noticed a bright yellow light falling from the sky from the west toward their house. They feared it was going to hit the house and ran outside. It didn't, but it did land across the road behind a small frame barn. The light was so bright, it made the barn appear as if it were on fire. They could see machinery inside the barn through the walls, and the timber structure of the barn stood out as if there were no siding boards.

More than a hundred years later, Mrs. Bennet watched a strange light hover over her son's house, just a mile or two from where her mother's story happened. It was the night of February 8, 1993. From her upstairs bedroom window, Mrs. Bennet can see her son's farmyard, and above the yard lights, was a large circular light. She watched it for about twenty minutes.

Helen Eckford, who lives on the Queen's Line a couple of miles away, also saw this light. She and her daughter Shelley were on the way home from a ringette game in Beachburg at about eight o'clock. They passed the Bennet farm yard and noticed a birght light low in the sky near the intersection of County Roads 21 and 7, just west of Forester's Falls.

Helen stopped her van and got out to get a better look at the large bright light accompanied by two flashing green lights and a red light. There was no sound. Shelly urged her mother to get back in the van.

As they watched, the light began to move toward Forester's Falls, and as it turned, the lights went out. Against the clear starlit night, they could see the shape of a large boomerang-shaped object.

Mother and daughter followed the object toward the Falls and watched it as it turned across the village toward the mill pond. The lights had come back on, and Mrs. Eckford stopped to ask Bob Coleman at the garage what he made of this light in the sky. He didn't make much of it.

The light moved back over the village and hovered over the farm of Warren Boese. The Eckfords drove into the Boese yard and Warren came out to see what was going on.

Mr. Boese works for Pem Air as a pilot and mechanic. He said it was difficult to tell how large the object was, but it seemed to be about 200 feet above the ground. He said it seemed to be flat along the bottom, and had coloured lights, as well as a bright white light. Looking at the object through binoculars, Mr. Boese commented that the light was a cluster of individual lights, very bright. In his opinion, the object was not an aircraft. It was something else.

Warren's mother, Doris, who lives across the road, also watched the light through binoculars. She said it looked like a crystal ball with a frisbee-type edge of solid light. She said it seemed to change shape, and was jiggling all over the place.

Warren Boese stated that he doesn't believe in UFOs, but did confirm he could not identify what the flying object was.

More than a dozen people saw a strange light in the sky around Forester's Falls the night of February 8, 1993. A worker at Timminco Mine near Haley Station went outside during the evening shift. At coffee break he told his co-workers that he had seen a strange-shaped moon to the north over Forester's Falls. It looked triangular, he said. His buddies kidded him. The moon was never north of the mine, and besides, it wasn't up yet.

Helen finally headed toward home and claims the light seemed to follow her. Mr. Boese confirmed the light left when Helen left his yard. She picked up her mother-in-law and drove west toward Cobden. The light then went ahead of her, and turning over Muskrat Lake, headed off toward Rankin.

Helen had watched the light for an hour and a half. She feels the object knew she was watching it, and it in return was watching her.

Before the Eckford story became public in the local press, two other people who were totally unrelated, and lived 30 miles apart, had the same dream.

A young woman, living on a farm about four miles from Forester's Falls dreamed that a bright light came out of the east and landed over a small pond in her pasture just south of the barn. She described the object as a cluster of lights, "like a round chandelier". The individual lights were so distinct, she could see etchings on each light, "as if you scratched an ice cube".

A young man near Arnprior woke up in a sweat from a deep sleep with a strange dream still vivid in his memory. He saw a bright light falling from the east, landing on an open field. He said the light was up in the

Forester's Falls area. His description of the site included two bush areas on the skyline with open fields in between. He remembers it was cold and he was standing on a road looking east and watching it. The light, when it landed was a cluster of bright little lights.

A week or so later the dream was still bothering the young man, so he drove to find the area. He walked along the road remembered from the dream, and found the two distinct areas of bush on the skyline. He kept moving until he recognized the exact spot in his dream. "The lights came down over that clump of brush", he said. Under the snow, he couldn't know the brush was surrounding the same pond seen in the young woman's dream.

Sightings at Forester's Falls, the Chalk River Nuclear Facility, crop circles in the Ottawa Valley and Outaouais, and the recent event witnessed by residents in Corkery all continue to mystify.

The search for truth goes on.

Dear Sir/Madame,

On 94-06-07 Gimli, Manitoba R.C.M.P. Detachment received a report of a U.F.O. sighting that occurred at approximately 03:30 hrs. this date. The sighting occurred at approximately two miles north and three and one half miles west of the Town of Gimli, Manitoba. Two persons saw the object for approximately three minutes. They saw a large donut shaped object that they estimated to be between three hundred and four hundred feet in diameter. The object was white light in color and had between nine and twelve flashing and/or pulsating lights running evenly around its circumference. The persons estimated it to be between five hundred and fifteen hundred feet in altitude and it was flying in an easterly direction (towards Lake Winnipeg). They said the object was slow moving and described it as being moderate in brightness. The sky was partly cloudy at the time of the sighting.

The object was seen by ################################## and his wife,

############################## who live at ######################
Rural Municipality of Gimli, Manitoba.

This report is forwarded for your information. If you have any questions please contact the undersigned at (204) 642-5104. Thank you.

Yours truly,

May 4, 1994

To /
Hertzberg Institute of Astrophysics,

Dear Sirs,

I wish to report the sighting of an unidentified flying object which appeared over the skies of North Vancouver at 9:55 pm Pacific time on the evening of April 30, 1994.

On clear nights it is my custom to stand ????? my patio for a while after darkness has fallen and try to recognize the more common constellations and watch for meteorite pho???? etc. I have done this for over sixty years and enjoyed and marvelled at the spectacle. Sometimes I see the new satellites but never before have I seen anything like this.

The object was of triangular shape such ????? an arrowhead, but slightly elongated so the front portion was farther apart from the back portion than the width of the back portion. It consisted of three very bright orange yellow lights with a dark mass in between like this:-

(witness drew sketch of isosceles triangular shaped object here)

It travelled from North East to South East at a low altitude but there was absolutely no sound and the speed was incredible, only 8 (eight) seconds to move across the sky from horizon to horizon. This was certainly no aircraft or weather balloon and the low altitude and excessive speed seems to rule out satellites which I understand usually need to operate at high altitudes.

I have seen Jumbo Jet aircraft coming in to land at Vancouver Airport on many occasions using a slightly mo??? northern but similar flight path but the object I saw was THREE times the size of such aircraft, even though it was travelling at a slightly higher altitude than the usual aircraft I see.

Please let me know if anyone else has seen such an object and if possible whether it is identified as yet. I found the experience a little disturbing to say the least but am also curious as to the origins!

Yours sincerely

UFO SIGHTING
TO: NRC METEOR CENTER
FR: BIG RIVER DET

ON 94-10-06 AT 0830 I RECEIVED A CALL ################################## ################## REPORTING UFO SIGHTINGS ON TWO SEPARATE OCCASIONS.
#1. 94-10-04 1900 - 2000 HRS. ####################, WERE WALKING ON A ROAD TO PICKEREL POINT RESORT, APPROX 10 KM NORTHEAST OF BIG RIVER. THEY OBSERVED A ROUND BLUE OBJECT IN THE SKY, WEST OF THEIR POSITION. OBJECT WAS MOVING HORIZONTALLY IN A NORTHEAST DIRECTION ALONG DELERONDE LAKE. SIGHTING LASTED APPROX. 2 MINUTES BEFORE OBJECT DISAPPEARED. OBJECT DESCRIBED AS BLUE, BUT CONTINUALLY CHANGED COLOURS WHICH INCLUDED BLUE, YELLOW, AND PURPLE. OBJECT ALSO HAD A VISIBLE YELLOW TAIL WHICH WAS DESCRIBED AS 1 1/2 TIMES THE LENGTH OF THE OBJECT. THERE WAS NO SOUND. DISTANCE COULD NOT BE APPROXIMATED, HOWEVER THEY FELT IT WAS A FEW MILES AWAY. ###### INDICATED THAT THERE WAS ALSO A RED GLOW ON THE FRONT OF THE OBJECT. SUNSET WAS STILL VISIBLE AND ########## THOUGHT IT MIGHT BE A REFLECTION FROM THE SUN.

WHEN THEY ARRIVED AT THEIR DESTINATION, ################# APPROX 8 KM FROM SIGHTING THEY ADVISE OTHERS, ################################### REPORTED THAT HER AND ## SASK HAD SEEN THE SAME OBJECT WEST OF THE VILLAGE AT ABOUT 2000-2100 HRS. THEY ONLY SAW IT FOR A FEW SECONDS. IT WAS IN THE SKY HEADING WEST. DESCRIPTION WAS IDENTICAL. THERE WERE A FEW CLOUDS IN THE SKY.

#2. 94-10-05 2300-2400 HRS. LOCATION WAS A FEW MILES NORTH OF THE PREVIOUS SIGHTING. ########### AND HIS WIFE ####################### WERE DRIVING BACK TO THE VILLAGE. THEY OBSERVED THE SAME DESCRIBED OBJECT JUST ABOVE THE TREE LINE AHEAD OF THEM. THEY STOPPED THE CAR AND NOTED IT SEEMED TO HOVER. A VEHICLE APPROACHED FROM BEHIND THEM . THEY ADVISED THAT THE BLUE OBJECT DISAPPEARED. WHEN THE VEHICLE PASSED THEM THE OBJECT REAPPEARED. #### SAID AT ONE POINT THE YELLOW TAIL DISAPPEARED WHEN THE OBJECT STOPPED. WHEN OBJECT MOVED THE TAIL REAPPEARED. OBJECT ONLY STOPPED ONCE AND THEN LEFT IN A NORTH EASTERLY DIRECTION. AGAIN NO SOUND. THERE WERE A FEW CLOUDS AND THE NORTHERN LIGHTS WERE VISIBLE.

AS A FOOT NOTE TO THIS REPORTED SIGHTING, THERE IS A FARM YARD JUST EAST OF WHERE ########### SAW THE OBJECT. THE YARD LIGHT IN THIS FARM IS BLUE. SUBJECTS ARE CONVINCED IT WAS NOT AN AIRCRAFT OR A FALLING STAR. THERE WAS ONLY ONE OF THESE OBJECTS SIGHTED AT EACH TIME.
NO OTHER REPORTS FROM ANY OTHER RESIDENTS OF THE AREA HAVE BEEN RECEIVED TO DATE.

Subject: Old UFO report with artifact involved
Date: 7 Dec 1994 23:55:24 GMT

I've come across an old UFO report that mentioned a physical object being left behind, and the correspondent, a Mr. Hobson of Utah, wonders if anyone around who knew of its disposition could be tracked down. Here is his report.

"When I was about 13 or 14 years old, I was living with my parents in Vancouver, Washington. I was quite interested in flying saucers, and once asked my Grandmother what she thought about the subject, and if she had ever seen one. Her reply surprised and intrigued me. The following recounts what she said.

"After the war (WWII) was over, but before I was born, she and Grandpa were living in the country, in a small frame house about 5 miles west of Molalla, Oregon, in a little area that I think was called Bear Creek. One clear morning in 1947 or 1948, after scrubbing the clothes, she went out before dawn to hang up the wash to dry. The time of the year was cool, but it was nice weather.

"My Grandma was a bit short, and had to look almost straight up to reach the clothes line. While she was putting clothes on the line in the morning darkness, she saw a strange looking light in the sky nearby, that was dropping very slowly. She really couldn't tell how large it was, but she said it was shaped like a tear drop, or like an ice cream cone turned upside down. When I asked her what color it was, she said it was sort of pinkish, and reminded her of an old-time gas light's glow. She said it looked just like the rainbow oil drop used in a certain (current in the 1960s) heating oil TV commercial. I had never seen that commercial, but she described it enough for me to tell it had an iridescent look to it.

"She watched the light silently drift downwards for a minute or two, when it suddenly went out. By the way it was dropping, she reckoned that it would land in a field near her house. She went back inside to finish her chores, but after the sun came up, she went to the field with a stick, and walked up and down the field in rows, using the stick to move the grass, methodically looking for whatever it was she saw. She searched the whole field, but didn't find anything.

"Later, in the afternoon that same day, some neighbor kids were playing by a small creek that ran along the field my Grandma had searched that morning. They came running back all excited to their house with something strange they had found. My grandma didn't see it herself, but everyone quickly learned it was a shiny metallic ball, about two feet in diameter. It couldn't have been very heavy, as the girl who found it and ran home with it was only about 12 years old. She took it to her dad, who worked at the Engineer's office in the city of Oregon City. He

couldn't figure out what it was or how to get it open. The ball was eventually sent to a college or university in Corvallis for examination (I suppose this was probably Oregon State University). Eventually word came back that it was "a burned out Japanese bomb". No one ever heard what became of it after that. My Grandma was skeptical of the explanation, but didn't think much more about it, and had forgotten it until I asked her about odd lights.

"To her best recollection, the incident took place in the spring or fall of 1947 or 1948, based on the weather, and that it was after my parents were married, but that I was not born yet (my parents were married in November 1946, and I was born in January 1949). She said the father of the girl who found the ball later died of a heart attack while in a car. She also said she thought they went to Alaska after that. Unfortunately, she couldn't recall any of their names.

"It was about 1962 or 1963 when Grandma told this story to me, and she was then in her early 80s. She was a tough, very matter-of-fact person, and never joked or told made-up stories. In fact, she was usually dead serious about everything, and pretty stoic most of the time. She passed away in 1974 in Portland, Oregon. (Grandpa passed away in 1956). Her full name was Minnie Winnifred Stuart Hobson; she was born in 1882 in Washington Territory... My Grandpa's name was William Murray Hobson.

"It seems unlikely to me that anyone could still be found who might have looked at the ball in Corvallis. Land records could be used to locate my grandparents' old house, and the creek, field and neighbor's house. Old Oregon City employment records might be able to identify the father of the girl that found the ball, and lead to her being located. That young girl, who once ran home with a mysterious metallic ball in her arms, would now be 58-59 years old."

If this rings a bell with anyone on the Network who knows or who can fill in any details on this, and they feel it's time to do so, please e-mail me about it. Thanks.

Triangular Shaped UFO's

_____

Regarding...
>Subject: Indiana Sighting - early 70s

>My daughter and I saw a triangular-shaped craft fly very low over our yard.
>It had rounded corners and lights in the corners and though it just skimmed
>the trees it made no engine sound - only a "whoooosh"-like noise. It was
>not flying fast and there were one or two others in the area at the same
>time but not as close. It almost seemed as if they were surveying the
>area. There were newspaper reports soon after that confirmed our sighting
>but we never reported it. Is this a common shape???

Indeed, there was one just recently in your part of the world:

Subj: Recent sightings in the E Date: 12-02-94 Time: 8:31
---
*@SUBJECT:Recent sightings in the Escondido, California area N
A possible UFO flap may be begining in the Escondido, California area. My sister has sighted the same UFO three times in the last 2 weeks. It appears as an orange light at first and closer up as a triangle shaped craft with lights on the corners. She saw it very close up and stated there was no sound. My husbands friend today was working in Escondido when he heard a loud boom and went outside to look around. He saw a very bright X-shaped thing in the sky very high over the I-15 and gopher canyon road area moving very slowly. He stated that while he was staring at it, it vanished all at once while has was not blinking. This might be related to the booming noises reported in the press and TV and denied by the military that has been occuring in the area this month. Anyone with anything to add please send me a message.

I have been attempting to collate similar reports and have recently come upon the following additions:

[START]

Triangular UFOs from the Project Blue Book Unknowns:

July 13, 1950; Redstone Arsenal, Alabama. 5 p.m. Witnesses: two skilled Arsenal employees including Mr. Washburn. one object, shaped like a bowtie, and like polished aluminum. Flew straight and level, then one triangle rotated 1/4 turn in the opposite direction and returned to its original position. The object then made a right-angle turn and accelerated away after at least 30 seconds.

Sept. 14, 1952; North Atlantic, between Ireland and Iceland. Witnesses: military persons from several countries aboard ships in the NATO "Operation Mainbrace" exercise. Among the sightings: one blue-green triangle was observed flying 1,500 m.p.h; three objects in a triangular formation gave off white light exhaust at 1,500 m.p.h.

June 24, 1953; Simiutak, Greenland. 11:30 a.m. Witness: weather observer A/2c R.A. Hill. One red triangle hovered and rotated for 15 seconds, then climbed for 5 minutes.

Sept. 3, 1965; Damon, Texas. 11 p.m. Witnesses: Brazoria County Chief Sheriff's Deputy Billy McCoy and Deputy Robert Goode. One triangular object, 150-200' long, 40-50' thick at middle and dark grey, with a long, bright, pulsing, purple light on the right side and a long blue light on the left side. Came from distance to 150' off highway and 100' in the air. Purple light illuminated ground beneath object and interior of police car. Driver felt heat on his left arm. Initial sighting lasted 5-10 minutes. Second sighting occurred later that night.

=END=

SUBJECT: Sighting Report A22C1

Please note this sighting report used the MUFON Sighting Report which I feel is quite inadequate. We have recently created a new sighting report which allows for more data, more specifics, in approximately 75% the space.

Date of Sighting: 10-22-92
SIghting time: 7:50 p.m.
Duration: 5 minutes
Place of sighting: Elk Grove, CA
Brief description: triangular
Brief description of location: near a farmer's field just above the trees by telephone wires
Where & what were you doing: driving home with my son after buying pizza
What made you first notice: bright light above trees not moving
What did you think the object first was: helicopter
Describe reaction/action during/after sighting: interested during, excited after
Describe the object and its actions: triangle shaped, moving slow in horizontal and vertical directions [note: a detailed picture was included with he sighting report]
How did you loose sight of the object: running from my garage to my backyard.

no other airplanes, helicopters, etc....before, during, or immediately after sighting

an object and lights observed- triangular with bright white lights that dim, object appeared solid

no sound, no smell
speed--5 - 10 mph...followed me
size- approximate small house
any other witnesses: my son, fellow work colleagues
today's date 10/30/92
vision: 20/10 20/15
hearing: good
health after sighting: bronchitis

Just a quick one--- rather large UFO spotted by numerous people on friday night april 16 in Tarpon Springs and Brooksville, Florida. Seen by Police and others who discript it as 200 to 300 feet long, triangle shape, flying silently just above the tops of trees.

The first report from the Project Blue Book "unknowns" is very significant. It is the earliest such report I have yet come upon and appears to refer to two triangular shaped craft which are pointing towards each other, forming a "bowtie" shape.

There was a similar recent report from central Scotland:

[START]

"Ray and Kathy Procek were driving along the motorway nearby (Bonnybridge).

As they approached a viaduct spanning the road they say they saw an object the size of a Jumbo Jet, hovering above it."

(Ray and Kathy are briefly interviewed at the viaduct and Ray states:) "The back end was elliptical and as we passed underneath it we could see it was triangular in shape. There was a light at each corner. We passed underneath the viaduct and looking back, there sitting on the other side was another craft and it looked like a mirror image, the way they were pointing towards each other."
[END]

Perhaps the most significant factor mentioned is that one of the objects rotated; "then one triangle rotated 1/4 turn in the opposite direction and returned to its original position."

That's a pretty fancy manoeuvre, particularly for 1950.

Or even 1953; "One red triangle hovered and rotated for 15 seconds, then climbed for 5 minutes."

The consistency of these reports lends significant credence to their authenticity. One can hardly fail to notice the same features highlighted in the "Popular Mechanics" report; "Observers who followed the craft long enough detailed unlikely maneuvers in which the vehicle stopped, rotated in place and hovered vertically, presenting a thin trailing edge to the ground."

The consistent factors include:

1. A triangular outline.
2. A "massive" sized craft.
3. The ability to move very slowly.
4. The ability to hover.
5. The ability to rotate around a central axis.
6. No noticeable noise emission.
7. Pulsating lights of varying colours visible on the underside of the craft.

If you can add anything at all to your report, e.g., how close together were the craft, did they rotate, was there a central light, how did they leave the scene, etc. I would be more than interested.
Similarly, if anyone else can add to these sightings, it would be very welcome.

Incidentally Jane, there is a picture file, named BELGUFO.GIF, available from many BBS's and ftp sites etc, which is a photograph, I believe taken by a policeman, of a UFO over Belgium during the 1990 flap.
It is a close-up of a triangular shaped craft, with rounded edges and lights at each corner.

Subject: Sighting in New South Wales, Australia

>From Page One, "Coonabarabran Times," Coonabarabran, NSW, Australia, Thursday, 17th November, 1994 -

"UFO Sighting"

"Six people have reported sightings of a UFO between 8:45 and 9:00 on Tuesday night approximately eight kilometres along the Mendooran Road.
Police said witnesses saw bright lights directly across a roadway and noticed a large object hovering approximately 200 metres above a house.
It was describved as a large diamond shape which made no noise. The object was then seen moving towards a timbered area.
Before taking off it was reported the eyewitnesses heard a loud roaring noise as the object accellerated off at extremely fast speeds."

Subject: Sighting in southern U.K.
Date: Sat, 17 Dec 1994 11:30:36 +0000

A report of an unusual sighting in the Bristol area was published in a local newspaper on December 16th. The shape of the object is described as "oblong" this is surely unusual? Extract of the report follows..
Two terrified woman claim they saw an Unidentified Flying Object hovering over Yate. (Nr Bristol South of England)
The two mothers say that they were followed by a brightly-lit spacecraft early on Monday morning (12th.Dec) Driving home at 12.45am they spotted the UFO. They said the craft had big green lights along the side, red lights at the head and tail, oblong shaped and flew low as they drove along Goose Green Way into Yate. At first they thought it could have been an aeroplane, but then they realised the craft was making no sound despite being only about five hundred yards away. It was following us, and when the car stopped it suddenly jerked back, stopped moving and hovered. It seemed to be watching us, when we started the car again it started following us again. Both woman plan the tell a meeting of the British Flying Saucer Bureau all about their encounter...End of extract.

Both ladies are 45 years of age according to the report, not likely to simply be seeking publicity.

MYSTERY LIGHTS IN OUTBACK

MELBOURNE: Wycliffe Well in the Top End [Northern Territory] boasts only a caravan park, a roadhouse and a population of three -- but it's facing the glare of publicity because of mysterious lights in the night sky.

Lou Farkas, who runs the roadhouse at Wycliffe Well, 374km north of Alice Springs, declares himself accustomed to the phenomenon.

But one of his employees Malcolm White is not so blase -- one of them gave him a scare last week.

"He was driving along the road on Monday night when it came down and rushed towards him," Lou said.

"It shot away to the side but not before his car engine cut out, stopping him from driving on for 15 minutes."

Malcolm White was not available to elaborate on his experience, he has gone into hospital for a leg operation.

Lou, 47, says he has seen the lights to the west of his roadhouse now and then ever since he arrived from Adelaide seven years ago but they have been causing him some trouble recently.

"They sit up there, orange with some red and green and they come down to the ground just before half past nine at night," he said.

"That's when the EFTPOS and the phone and the fax play up and Telecom can't do anything for me."

He said the 300 or so Aborigines of the Alicurung people who live in the district had known of the lights for a long time.

The proprietor of the newspaper at Tennant Creek, Jasmin Afianos, 31, travelled the 130km to Wycliffe Well on Tuesday to view the phenomenon -- and it lived up to everything she had heard.

"One of them is bigger than the other and they are about 45 degrees from one another," said Ms Afianos, whose article about them was published in a Darwin newspaper yesterday.

"They are not on show every night but when they are they come down about 9.20pm and cause trouble with electricity."

Asked the question sceptics always put -- "Did you take any photos?" -- she said she had but was still waiting to receive the prints back from the developer.

And she will return to Wycliffe Well soon -- this time with a video camera.

AAP learned about the phenomenon from Ross Dowe of the National UFO Reporting and Sighting Hotline which has a new number of 190-224-3529.

Quake theory on UFOs
by GRAEME O'NEILL,
science reporter

REPORTS of UFOs in the night sky near Tennant Creek in the Northern Territory may have a more down-to-earth explanation - they may be a sign of earthquakes.

Tennant Creek, about 500km north of Alice Springs, is Australia's earthquake capital recording more than 20,000 quakes since 1966.

There have been reports from around the world of eerie airglows, large glowing domes, and lightning flashes just before, during or after earthquakes.

Several people in the Tennant Creek area have reported seeing orange, red and green lights in the sky during the past week, and silvery, dome-like structures.

Earthquake expert Dr Trevor Jones of the Australian Seismological Office in Canberra, said yesterday that the Tennant Creek phenomena could not definitely be associated with earthquakes. But he cited a 1968 report by a Japanese scientist of glowing "domes" being seen around the time of a major earthquake.

The same report mentions red, orange and green lights in the sky, possibly reflected off high clouds.

Dr Jones said geologists had measured high voltages in stressed regions of the Earth's crust, possibly due to a phenomenon called the piezo-electric effect.

This may explain the problems Mr Lou Farkas, a roadhouse proprietor at Wycliffe Wells, 127km south of Tennant Creek, has been experiencing with his EFTPOS machine.

Not long before California's destructive Loma Prieta quake in 1992, radio programs were drowned in static.

Magnetic fields associated with electrical activity may cause current surges in the sensitive microchips used in EFTPOS modems - or in modern car ignition systems.

Scientists who have studied earthquake lights also suggested

strange observations by people in the Tennant Creek area since the early 1980s may be due to ball lightning - glowing plasmas of highly charged gas leaking from the Earth's crust.

According to Mr Farkas, one of his employees, Mr Malcolm White, was driving at about 7.15pm on Monday last week when a glowing ball descended from the sky and rushed towards him, causing his car's ignition to go dead for 15 minutes.

At 6.19am on September 1, about 36 hours after Mr White's harrowing encounter, a 4.5 Richter earthquake shook the region.

UFO caught by camera

This is a dramatic shot of an unidentified flying object seen in the skies near Wycliffe Well last week.

The pictures comes from video footage taken by Imparja cameraman GLEN ADAMUS.

Last weekend, _The Sunday Territorian_ revealed that the mysterious object and another light had been seen by staff and tourists at the Wycliffe Well roadhouse, 125 kilometres south of Tennant Creek, every night for the past three weeks.

(Caption: The mysterious object seen in the skies over Wycliffe Well roadhouse.)

[The object appears to be a fuzzy white ball against a dark sky.]

Date: Thu, 22 Dec 1994 03:07:34 -0500 (EST)
Subject: Story Time: No BS

1982ish.

Where we lived was a semi-rural area south of Greensboro, North Carolina. A typical Piedmont area, mixed forest and relatively small fields (-20 acres.), not too densely populated. One afternoon, my mother, father, and sister left our house to go to Greensboro. They turned out of our driveway and headed for the main road. As they were pulling up to the stop sign, all three of them saw something very, very strange. A grey/black triangular object ascended vertically above the treeline about 1/4 of a mile away behind the house directly across the road. All three of them were quite stunned to see this thing, and none of them had any idea what it could be.

My father is a civil engineer by education and has a passion for light aircraft. He is not given to bursts of fantasy. He is familiar with most civilian commercial jets and private planes. What he saw did not

fit into any of the configurations of any aircraft that he knows of. Also, the flight characteristic was very odd for an object of its size. Judging from the house across the road and estimating the distance from the object to be about 1/2 mile, my father said that the object had to be as large or larger than the house, a typical single story ranch. The object appeared to rise vertically from behind the trees in a deliberate fashion, ascending slowly to a height of a few hundred feet. They have no idea exactly how long they witnessed the object. Then, the object just disappeared. Vanished. It didn't fly away or descend. It was just gone.

All three of them saw the same thing. My sister who was about 13 at the time described her first impression of the object as it being a hot air balloon. To her, that was its approximate size. But she said that it soon became apparent that she was looking at something "mechanical". The general shape was triangular, but there were objects that she describes only as "things" protruding from the underside. After she realized that what she was seeing wasn't a balloon, she looked at my parents. They were both gaping in disbelief at what they were seeing. My sister said that she was afraid of what she was seeing and did not want to see it. She wanted it to go away.

After the object disappeared, my father drove around looking for it again but could not find it. The three of them returned to the house. I remember when they came back how shaken they were. My father and I went back out to search for it, and he pointed out the general area of the field from which he thought the object had risen. The next day I went on a pensive search through the connecting fields looking for ground traces, but I found nothing. I was almost terrified walking through those fields with my dogs. My parents never talked about it outside of the family, and until recently the subject never came up again.

I'm not BSing. Hope I'm not boring you.

Subject: Michigan Sighting 12/21/94
Date: 22 Dec 1994 12:43:00 -0500

Just heard on the noon report that a cylinder abou 60 feet in diameter was spotted hovering above a womans farm south of Travis City Michigan on 12/21/94. She called the police and an the officer who came to the farm also saw the object, plus they video taped it. Jets were also seen criss crossing the area, but the milatary says they know nothing. Anyone who hears more please post. I wonder what will happen to the video tape, they said the authorites were looking at it.

****

Date: Fri, 23 Dec 1994 00:52:07 UTC
Subject: UFO Sighting Near Travis AF

This is a UFO sighting that occurred in Nothern California recently. I know the individual, "MC", and I believe he is telling the truth. It is

especially interesting since the UFO was large and triangular in shape.

==========
INTERVIEW WITH A WITNESS TO A UFO SIGHTING - FAIRFIELD CA.

Sysop's Note: The person being interviewed here wishes to withhold the last names of the witnesses. I have been acquainted with "David" for almost two years. He has told me that he is a pilot and that he has had at least six UFO sightings.

01/27/94

MC = Mike Coyle
DJ = David

MC: Why did you go to the area of the sighting?

DJ: OK, well I was visiting with a friend which I try to do periodically. He has seen some bizarre things out there. So we happened to be going around looking at the sky. Actually talking at that time about what he had been seeing recently.

MC: You were walking where?

DJ: He's on a farm, his place, right next to the windmill farm. It's real close to Bird's Landing (CA). Maybe a mile or so away, in the Fairfield area.

MC: How far is that from the edge of Travis Air Force Base?

DJ: Oh I'd probably say fifteen, twenty miles at the most.

MC: So your friend has been seeing strange things flying over his house?

DJ: He has seen some really big things hovering over his house and strange things in the back of his place.

MC: How does your friend know you?

DJ: I have known him through a mutual friend for several years.

MC: Your interest in each other was originally not about UFOs? You just knew him and as time went by he had these experiences of with things flying over his house?

DJ: What's right.

MC: And then he told you about it? So you decided to go out and see if you could actually see one?

DJ: Yes, and I wish I had my camera with me.

MC: Why didn't you have a camera with you?

DJ: I wasn't really expecting to see anything there. I have brought cameras there before but we never saw anything when I did.

MC: So you have actually gone out there before to try to see these objects and seen nothing?

DJ: Yeah, he told me about this stuff, and I said, "God I'd love to get a picture." I said, "Why didn't you get a picture? You've been out there so long?"

MC: How many times have you gone out there to look around?

DJ: Maybe five or six.

MC: So then you finally saw one? What was the day, date and time of this sighting?

DJ: In the evening, maybe around eight or nine, after dark. It was about two months ago. I can't recall the exact day. Chilly, clear, a slight bit of fog, it was almost like, in fact he had mentioned this before, he had seen a kind of fog come up around there where they where doing some of their stuff back there. He was of the opinion they there putting out a fog field to make it hard to see.

MC: So you were in his house and you decided to go walk around his property?

DJ: Yeah, we were inside and decided to go out and walk around because he's got a lot of animals. Then we saw something come by and it was stranger than most planes would be because it had so many lights on the front. At first I just looked at the lights because they there so bright. They were kind of amber colored, more of a whitish amber and there was a whole row at a "V" angle.

MC: When you first spotted it what direction where you looking?

DJ: I was looking over towards Travis Air Force Base area from Birds Landing, so I guess that would be east.

MC: In what direction was the object moving?

DJ: It was moving from south to north.

MC: Was it coming right at you or was it moving across your line of sight?

DJ: It was moving across my line of sight, a few hundred yards away up in the air. We were just to the west of the windmill generators. There are some hills to the north. So the object was over the hills. As it came over I could see it pretty well and then it banked. It was going slower than a plane could

have flown as far as I could tell because it was too low.

MC: What was it's approximate altitude?

DJ: I'd say approximately five hundred feet. When it banked it banked at a very extreme angle, like over forty five degrees.

MC: When you first spotted it how far away did it look?

DJ: A couple thousand feet away.

MC: How large did it appear to be?

DJ: It looked really pretty large, about the size of a, but not quite as big as, one of those huge transports.

MC: Like a C-5?

DJ: Yeah, but it was a little smaller than that but possibly as big as a 747. I thought it was a bomber at first but it was going to slow for how low it was. And then all those lights on the front. I have never seen planes with a whole row of lights.

MC: You say it was going slow, near stall speed for a plane?

DJ: Below stall speed for a plane. Especially when it stopped! It just hovered. At first I couldn't really see the shape because it was a dark color but the lights were so bright that you could tell when it flew over that it was a triangular shape, a perfect triangle.

MC: And your friend was with you during this? Would you like to give his name?

DJ: Yes, he saw it. His first name is Terry.

MC: What was his reaction to this?

DJ: He said, "That is the exact same thing I saw over my house. It looked like the size of a football field."

MC: How high up in the air did he think it was at that time?

DJ: He thought it was fifty to a hundred feet above his house. This was on another night. He said it was huge and it just sort of hovered there for awhile and then it left.

MC: Say there is some kind of operation going on out there with unidentified aircraft. He is very close to it. Has he ever been approached by the Air Force? Or had any contact with other authorities?

DJ: I don't think so. He's never mentioned anything.

MC: He's never made any reports to the authorities on his own?

DJ: No.

MC: Why not?

DJ: He pretty much knows they're up to something.

MC: And he doesn't want to bring any attention to himself?

DJ: Exactly. He doesn't feel it would make any difference. He talks about it freely but he would never go to the government.

MC: OK, so, you say it was traveling south to north and as the object got over Travis it hovered?

DJ: Well more over, actually it was behind, a hill when it started hovering but what seemed to be on the other side of the hill, was probably some more of those windmills, or least it was nearby. It certainly was directly adjacent to those windmills.

MC: And then what happened? Did it start to land?

DJ: Actually, it went over a couple of times before it landed. It just flew over and banked and turned around the other direction. I think it even went behind the hill so we couldn't see it for awhile. The first time I saw it I don't think it landed or even completely stopped. It just slowed down and banked in a extreme bank and that's when a could see there were three, sort of glowing, round openings at the bottom. I would guess they were some sort of propulsion system. There was one at each point of the triangle. Up to this point I really couldn't tell what the shape was other than it was a triangle.

MC: When you say triangle, what type?

DJ: Equilateral.

MC: So it didn't have a acute angle shape like the new stealth bombers or stealth fighters.

DJ: No, it was perfectly symmetrical.

MC: So it would make it look much more squat than one of the stealths, rather than swept back?

DJ: Yes, that's right. And then after it came back the second time it was hovering at that point. And then it did the most bizarre thing. I was trying to see what the overall shape was because it was kind of hard to tell with those bright lights on the front. Then the bright lights went off. At the same time these incredibility bright strobes where lining the edge of the

triangle. And what it looked like was two platforms which were triangular in shape. The lower one had strobes all the way around the triangle. Then the upper part, it was maybe ten or fifteen feet above the lower triangle. There was a second platform which was also triangular shaped and it had more strobes. When the strobes went on, they weren't all going on at the same time. The strobes on the bottom would alternate with the strobes on the top. So it was a real rapid, maybe three, four or five times a second. Flashing back and forth between the upper part and the lower part. It only did that when it was hovering, about to land.

MC: And then it started to descend?

DJ: Yeah, then it started to descend and descended all the way behind the hill. The reason I could tell it was alternating the strobes is that when it began to descend behind the hill, the one section, the lower section, was behind the hill and the upper section wasn't, then the rate of the flashing was half as fast. Finally it dropped completely behind the hill.

MC: So at this point it was hidden from your view? How far away was it then, when it went behind the hill?

DJ: Probably a couple, maybe three hundred yards.

MC: So it was off of your friends property?

DJ: That's right.

MC: Do you know what property it is? That's not Travis Air Force Base is it?

DJ: No, I think it's either an open field or is part of the windmill farm.

MC: It was only three hundred yards away but you didn't go towards it?

DJ: No, because it would have required going through a field with lots of bushes and a few fences and...

MC: Has your friend ever seen one of these things land in that area before.

DJ: Yeah, I think so. I'm pretty sure he had said that he had seen them land back there but he had never seen the area where it landed.

MC: He has never gone in back of the hill?

DJ: No, I don't think so.

MC: Are there any public roads going through that area?

DJ: It's kind of isolated from the other roads in the area. When I go there again I am going to try to check that area out.

MC: OK, so it went down behind the hill. Then what happened?

DJ: It sounded like large amounts of equipment were off loading. Like trucks, jeeps, sort of like a whining sound like a large truck.

MC: But that is just supposition on your part, right? You could not actually see anything at this time, right?

DJ: Yes, just the sounds of heavy machinery. It sounded like large geared type machinery.

MC: How long did this go on?

DJ: That lasted for maybe ten minutes and then it took off again.

MC: And then the object rose up from behind the hill?

DJ: Yeah, except I don't think it went straight up this time. I think it went up at more of an angle. It didn't go up quite as high. I believe it was going north again. And it went pretty far north. There are some more hills so I couldn't always see it. Then it turned back around and came back and landed at that same place again and it "off loaded" some more stuff but this second time it was a longer period of time. More like twenty or thirty minutes.

MC: When it made the loop and came back, how big of a loop was it?

DJ: Hard to say because I didn't have it in view the whole time.

MC: When it came back to land the second time was it in the same position it was in, the first time?

DJ: Yes, it made the same maneuver again with the lights blinking. Then sounds of a lot of activity and then it took off again to the north and that was the last time we saw it.

MC: Did it go away fast? Did it go away slow?

DJ: Fairly slow.

MC: So it rose up and moved off slowly to the north at low altitude until you lost sight of it?

DJ: Yes, it made some noise but it didn't sound at all like a jet engine. Like that whine sound. It was more like a "shsssss", or a slight roar. It wasn't very loud.

MC: OK, when it went away, then what did you guys do?

DJ: I'd almost forgotten about this part, but all this time, in addition to fact that we were watching this thing. When we first saw the flying object, we saw some sort of weird thing coming through the field and we both, I'm trying to remember at what point that happened, but I know at some point, possibly even before we saw the flying object for the first time, he thought, and I did to, we saw what looked like a skinny creature. Tall, but not real tall, like a child height.

MC: How far away?

DJ: It was out in the field and more coming from the north. To the right of where it landed. That area was a long fence line that went back towards the windmill farm. Maybe a hundred feet away. It was real dark and I was having a hell of a time telling if I was seeing anything. It wasn't moving much. What ever it was it was very still. And we were kind of scared and I, then we started paying attention to the flying object. We were scared. He was saying, "I see something." I said, "I think I see something to back there." Then I heard this weird thing talking. It was like the sound of a child. When something like that happens and you don't expect, at night in an empty field, to hear a child laughing and playing. Sounds of a child talking. I thought was that an animal? What is that? It was like something walking. I mean what ever the voice was, it was moving. But I really couldn't see it. So we both tried to kind of look at it. Tried to find it again. He keep claiming he could see something and I couldn't see anything at that point. It was too dark and too shadowy to really tell. Let's put it this way, if that thing hadn't been there I would have seriously considered walking down the fence and around the hill and walking back to the other side. But whatever it was, I got the clear feeling that either they were sending something to watch us or warn us away. Whatever it was it kept us very effectively from going back behind the hill.

MC: So then you went back to the house? When you got back what time was it?

DJ: Yes, it was probably about 10:30 pm.

MC: I guess you probably discussed this at length in his house?

DJ: Yes.

MC: Did you tell anyone else about this?

DJ: I told a couple of people I know. A couple of friends.

MC: Does Terry have animals on the farm?

DJ: Yes.

MC: Dogs? Where they with you during the sighting?

DJ: Yeah, I remember when we first started looking at it, to see if there was something in the field, the dogs were barking at something.

MC: Did they approach it?

DJ: I think one of them did run back there. Like it was going after an animal.

MC: They didn't try to attack this thing you saw walking around?

DJ: No. They didn't seem to have any interest.

Subject: Triangular UFO's
Date: Thu, 29 Dec 1994 00:45:00 GMT

This is a cross-posting from a.p.ufo, also relevant to recent discussions here concerning triangular UFO's:

Regarding...
~Date: Fri, 23 Dec 1994 03:10:26 -0500
~Subject: Strobing?

Within a day several reports from friends and family have come to me. Two from staunch skeptics of the paranormal. Some backrounmd info: I and all parties concerned live in Pittsburgh, PA and one night my sister was on her way inside her house when this very bright light shown on her. There was no source she could pinpoint, just an extremely bright light which was tight (only shown on her and a small area surrounding her), the light apperared to come from a low angle but as she said for the short time it was on she couldn't pinpoint it. Her fiancee' is a real skeptic and he had the same thing happen to him on the way into the house. Blindingly bright light which stayed on for about a second and had a tight focus. Light too bright to pinpoint in such a short period of time. THEN tonight (or this morning) the very same thing happened to a friend of mine in my driveway (the other incidents happened at my the couple's house which is mile from here). Anyway he too is a big skeptic of the paranormal yet he yelled for me and asked "Did you see that? Did you see that!" To which I responded, "See what?" and he related the same details as above but he said the light had a somewhat greenish color. I then told him about my sister and soon to be brother-in-law's sighting.

Some nights before we were in my driveway and spot a craft (won't call it a plane yet) which had 3 lights on it in a triangular formation and a red "beacon" light underneath. Now what drew our attention to it was it's wobbly motion at first. It seemed like it was floating like a falling leaf. (since we live on a flight path to the Pittsburgh Internation Airport which is about 3 miles away, we see planes and helo's all the time). We ran out into the street to get a better view and at the same time it came out from the trees it was behind at a fairly rapid (but still

within normal aircraft flight characteristics) speed. The craft seemed to be at about 2,000 feet but it is hard to estimate distances at night. All the while no sound was heard until it was directly above us. It slowed and paused in mid-air for a second and emitted a real low but audible rumble which seemed to come on instantaneous, as if someone said "OK, turn on the sound". Most jets, civilian and military are pretty loud at this height when they are directly above you. Anyway all of us agreed it was strange but pretty much agreed that it was somekind of military aircraft. We could see a faint outline of an elongated, acute triangle with rounded edges but it was very faint the only wreason I think we saw it was because the underside reflected no light and the backround was brighter due to the clouds. Had this been a clear night I doubt we would have detected an outline. Anyway, has anyone else had any sightings of unusual nature in this area recently? If so let me know.

A couple of recent UFONet postings may be of interest to you:

---

*@SUBJECT:Recent sightings in the Escondido, California area.
A possible UFO flap may be begining in the Escondido, California area. My sister has sighted the same UFO three times in the last 2 weeks. It appears as an orange light at first and closer up as a triangle shaped craft with lights on the corners. She saw it very close up and stated there was no sound...

~Date: 06-12-94 (00:56) Number: 12
Subj: Indiana Sighting - early Conf: (579) AltUFORepo

~Subject: Indiana Sighting - early 70s
My daughter and I saw a triangular-shaped craft fly very low over our yard. It had rounded corners and lights in the corners and though it just skimmed the trees it made no engine sound - only a "whoooosh"-like noise. It was not flying fast and there were one or two others in the area at the same time but not as close. It almost seemed as if they were surveying the area.

There were newspaper reports soon after that confirmed our sighting but we never reported it. Is this a common shape???

****

Date: Fri, 20 Jan 1995 03:18:27 -0500 (EST)

Thanks for your reply. I'm just getting the hang of e-mail so please excuse any mistakes. What I can tell you about my sighting is prety vague. I was traveling home to Elizabeth City in Oct. '94 for Fall Break. It was about 9:30 pm. I felt like the sighting took forever but by my dash clock there was no loss of time. I was approaching the Chowan River in Bertie County on Hwy 17 south. As got near the bridge I first thought the DOT had added more lights to the drawbridge section. Then maybe 20 feet from the bridge I realized that the lights I was seeing were on the shoreline about 5

feet above the treeline. I heard absolutely no noise (even cut off the radio and rolled down the window because I thought the silence was odd.) The lights were red and looked like the pattern of running lights on a semi from the side and a triangle once they passed and I could see the back. There is a Coast Gaurd Base in E.C. and I figured it was a new helicopter I didn't recognize. I mentioned the occurance to my cousin who lives less than 1/2 mile off this road on the river. I figured that a fishing boat was lost and the coast gaurd was looking for it or running night practice.

She said she hadn't seen or heard anything about it. I still beleive if it was the Coast Gaurd there would have been some noise and the pattern of lights was strange.

Hope this helps you. If you have any ?'s let me know.

>As got near the bridge I first thought the DOT had added more lights to the
>drawbridge section. Then maybe 20 feet from the bridge I realized that
>the lights I was seeing were on the shoreline about 5 feet above the
>treeline.

1: What is the approximate elevation of the tree line above the river?
2: Was the object on the same side of the river as you?
3: Approximately how far was the object from your position?

>I heard absolutely no noise (even cut off the radio and rolled down the
>window because I thought the silence was odd.)

4: Did you notice normal background noise for the location (Chowan River, right?), ie. wind, insects, frogs?

>The lights were red and looked like the pattern of running lights on a
>semi from the side and a triangle once they passed and I could see the
>back.

5: Did the "body" appear to be solid, and if so, what shape was it?
6: Did you observe the object until it was out of your sight?
7: How would you describe the speed at which the object was travelling? ie, slow, med, fast?
8: At anytime during your sighting, did the object change speed or direction?

Regarding...

>For about a month, I have been working with a man in Sacramento, CA, who
>is involved in an ongoing case in the Sacramento area. The man
>has, since November, been regularly going to parts of Sacramento and Yolo
>counties (almost nightly) and videotaping unusual objects and activities.

>These videotapes include:

>1. Large, airborne triangular shaped objects, usually with three distinct
>lights (one at each corner), occasionally with additional, fainter lights
>on what would be the leading edges of an aircraft fuselage.

>2. Smaller triangular craft which appear to be 20 to 30 feet on each side.
>These craft are not equilateral triangles, they appear to be close to
>isosceles triangles, but not quite. These almost invariably have one
>light in each corner; one red, one white, and one medium blue. They also
>appear to have a fairly large, hemispherical "bubble" in the middle of the
>triangular surface, which sometimes glows, getting extremely bright for
>short periods.

Time: Sun 8 Jan 95 14:53
Hi there,
I'm new around these parts so I thought that I would introduce myself with
an interesting story about UFOs that was in one of the local free papers..

Apparently there was a rash of Ufo sightings all across Essex towards the
end of November. What makes this more significant was the fact that they
were all on the same night and they all described the same craft...

On Monday 28th November there were over 100 phone calls made to Colchester
Police reporting that a strange craft was hovering at about roof height in
the district. It was even reported that rush hour traffic was slowing down
so that the drivers could watch the UFO.

The description that all callers gave was the same:

Nearly 100 ft long and bathed in an orange/red light, triangular in shape
with three floodlights at the corners.

An eye witness reported to the paper what he had seen:

"I was driving home when I became aware of a sudden burst of light above
me. I couldn't see what is was for a couple of minutes, but then it moved
ahead of me and I could clearly see three bright white lights in a triangle
shape. One of them was flashing every few seconds."

Apparently the craft matched pace with the car he was driving in for
several (subjective?) minutes after which it shot off at great speed.

****

Subject: Some interesting reports...
Date: 21 Jan 1995 13:05:42 -0800

Hi, all...
Just saw this newsgroup and thought I would contribute a little. These
are not my own personal experiences, I heard about them and researched
them as much as I could. If anyon knows of similar experiences, please
send me e-mail. (no flames please)

1) Date: sometime in late fall, 1980. Time: early eve.
Location: rural highway, West central IL. Personal info: Woman and her infant son. She was about 26 years old. Incident: She and her son had left a large city after Christmas shopping and picking up a brand new car. She had been driving about 30 minutes and was about 1/2 the way home when she noticed some bright lights above a telephone relay tower. The tower was directly ahead about 3 miles. She thought it was just a helicopter. As she got closer, she could hear no helicopter noise. She even rolled down the window and slowed down but still could not hear a thing. At this point she becomes rather frightened. Her son, in a child-seat next to her was simply having fun, playing with his toys. She decided to speed as fast as she safely could to get by the tower and the lights. BTW, she reports the lights seemed to move randomly, but the source of the lights rotated slowly. When she was within about a mile of the tower, she passed-out. She woke up about 10 minutes later. The lights wer gone, her son was fine, playing with his toys, and the car was in a shallow ditch next to the road. After making sure her and her child were ok, she evaluated the car for damage. She made some startling discoveries. The plastic seat covers, the kind found on new cars had melted into the fabric of the seats. Even though she was sitting directly on the plastic, she had no burns. The heater and radio would not work, even though they did before. She stated that the auto repairman was completely baffeled as to how the heater motor coils could have been fused together, and how almost every trace on the PC board of the radio was burnt. The engine computer was not damaged. I called the local airport and they stated there was no reported aircraft at that time.

2) Date: summer, late 70's, early 80's. Time: Late night. Location: Western IL University campus, 'Q' lot. Report: It was reported to Public Safety late one night by a janitor that was working late, that someone was on 'Q'-lot with some bright flashlights. Please keep in mind that this was during the break between spring and summer semesters, and that 98% of the student body was out of town. Because of this, there was only a few Public Safety officers working. An officer was paged and asket to investigate. As the officer go closer to the lot, he could see the lights. They seemed to slowly circle the source, and wer targeted in a low angle tward the ground. as the officer got closer, he could see that the lights were coming from a source about 20 feet in the air. (as approximated by 1/2 the height of the light poles) As he came closer, he noticed that the lights eminated from something hanging in the air. From this point on, descriptions get fuzzy... He called for backup and waited. When two or three other officers arrived, they came closer to the lot. (BTW, the lot is about 100 yards by 300 yards) As they arrived at the edge of the lot, they could make out what looked like a cubical object directly above the light (I could not uncover the size) The state police were called. One story states the object quickly accelerated to an altitude of about 100 feet, and the other states that it went almost out of sight. There was no sound coming from it at all. One story states the state police arrived in time to see it, the other story states they arrived too late. The state police told me that it was probably a hoax. The Public Safety officers were told by administration to say absolutely nothing about it and deny that it happened. This story came

from a few instructors (a couple with Ph.D.s, and a wife of a Public Safety officer).

Subject: Non Illuminated Triangles
Date: 21 Jan 1995 16:27:49 -0700

Anyway, I would like to ask if anyone has ever seen or might know about an object I have seen on two seperate occasions. The first time was probably about fifteen years when me and a couple of friends saw a V-shape formation of objects (5-7 of them) fly over head at what appeared to be an incredible speed. These objects didn't seem to have any illumination except for the lights from the city reflecting off the bottom of them. They appeared to be a dullish metallic color with a slight tinge of green. It was hard to judge their altitude or speed,but I would guess that they were maybe 300-500 feet up and they went from being directly overhead when we first noticed them to being gone from sight in about three seconds. They were all the same size and shape which was circular with small rounded swept wings and they didn't make a sound as they flew by. The second time I saw this object was about four years ago, only this time there was only one of them. I saw it with my wife and sister but only my wife got a good look at it, as my sister couldn't locate it in the sky. Again it was not illuminated, very fast and made no sound. This time it appeared to be higher up and harder to spot. I live in Edmonton Alberta Canada (Pop. 600,000) and we did have a military air base just outside of town.(Closed recently) Although if they were anything military I would guess that they came from C.F.B Cold Lake which is a few hundred miles north of here and also where the U.S. cruise missile testing was being done. Any input would be appreciated.

Subject: Fire in the sky? Montana - Seattle (fwd)
Date: Sat, 21 Jan 1995 23:06:10 -0500

I live in Northern California and was speaking to my Mom, who lives in Spokane WA, this evening, when her 11 o'clock news came one. Apparently dozens of people Between Montana and Seattle had seen a lite in the sky and the news said that rescue workers had been dispatched in the Spokane area, but the FCC said that it was a meteor and searchs were called off. The news didn't say which way the object was traveling, E to W or W to E, but Spokane, is roughly in the middle of the two places from which it was seen. Seems kind of odd that they would think that something had crashed near Spokane when it is between the two farthest points from where it was viewed? I would appreciate any more information anyone could give me. Did anyone happen to view this? It didn't make our local news in N. California, not tonite at least.

Subject: UFO Alaska Questions
Date: Sun, 22 Jan 1995 13:54:08 -0500

UNIDENTIFIED OBSERVATION

~Date: Tuesday, December 20, 1994
approx.11:45 p.m. to 1:45 a.m. Wednesday, December 21, 1994. Location: Remote Mountain cabin 12 mi. NE of Talkeetna, Alaska
Section 15, Township 28N, Range 4W, Seward Meridian
Sky Conditions: Clear, No Clouds Object Observed: Distant but bright flashing red, green, blue and maybe purple lights from a disyant position that remained pretty stationary. Request: To know if it is an object known by others, and what it was.

Observation Description: I sat in the outhouse about midnight with the front opening to the northwest. I looked up about due north and saw bright strobes of red and green, thinking it was a jet en route from Anchorage to Fairbanks. (Talkeetna is in the Anchorage-Fairbanks air corridor). I looked up again and the lights had not moved any appreciable distance like jets do. I noticed that one of the blinking lights appeared to be purple and blue, unlike any aircraft markings. The lights appeared about 40 degrees off the horizon almost due north and did not appear to move. The strobes were quite bright for what seemed to be an object quite far away. My wife joined me in the observation and saw the same red , green and blue strobe-type lights, but did not see purple. I put the binoculars on the lights and could make out no shape, but the colored light flashes appeared to come from the top and bottom. I got out my daughters telescope and tried to find the object but only found a luminescent sphere somewhat like the moon except without dark areas. Since it was near zero with a bit of wind, I had trouble stabilizing this small telescope, and am not sure I focused on the object I saw with the binoculars. I did not see any other bright objects in that part of the sky.

We continued to observe the colorful strobe lights for more than an hour an a half, during which time it travelled a few degrees to the east and became increasingly distant. I've observed planes and satellites, but never anything like this. The night was so clear that anyone for many miles around could have observed the same thing.

I spoke about it on the radio to a neighbor a few miles away the following night, and she said she had seen a similar thing about this time of year some years ago. There are military operation areas nearby, and maybe there is some sort of super slow satellite or some extremely high helicopter, but I am curious to know what it might have been.

Subject: 3 Recent NJ Sighting Reports
Date: Tue, 24 Jan 1995 17:54:56 -0500

UFO sighting report (1)
Location- USA, NJ, Somers Point (south Jersey)
Date- 22 JAN 95
Time- 18:30 EST (6:30pm)
Description- Large bright light, greenish-white in color, traveling at high rate of speed at an aproximate 35 degree incline. No impact was seen or heard. Object travelled in an East to West direction. Duration of event was under 2 minutes. Several calls were made to local police departments. Police contacted the FAA technical Center at Pomona NJ to confirm any radar contact. FAA advised there was negative radar comfirmation. Local papers carried story on 23 Jan 95. Conclusions- (Possibility Ratings-High,Med-Low) Bolloid Meteorite (High), Space debris (high), Aircraft-Coventional(Low), Aircraft Non-Conventional(Med).

Special Report: There have been two separate reports recieved by this investigator in the past two months. We were unable to confirm or investigate these reports, but their posting is considered worthy at this time.

UFO sighting Report (2)
Location- USA, NJ, Somers Point
Date- 3 Jan 95
Time- 16:00 EST(6:00PM)
Description- Large very bright light, bluish-white in appearence. Object was seen by retired aircraft engineer and his wife. Object was described as a large glowing ball. The man told his wife to take a picture of the object. As soon as the wife brought the camera up to her eyes, the light went out, and disappeared. The couple were traveling across the Beasley's Point bridge in their car. Object appeared to be following the river and was at an altitude of between 100-200 feet.
Conclusions- BM (low), Space Debris (low), Aircraft Conv. (Med), Aircraft Non-Conv (High)

UFO sighting report (3)
Location- USA, NJ, Mays Landing (South Jersey)
Date- Mid Dec 94
Time 21:00 EST (9:00PM)
An assistant district attorney reported a large triangular-shaped object hovering over the lake behind his yard. The object was observed for several minutes. The witness went inside to get his camcorder, but upon returning found the object had vanished. The object had three white lights, one at each corner, and a single red light in the center.
Conclusions- BM (low), SP. Deb. (Low) Aircraft Conv (low), Aircraft Non-Conv (Very High)

Date of Sighting day/month/year: 10/4/94
Sighting Time - In the form of - Am/Pm + Time zone: 7:25PM CDT
Duration - In the form of Seconds, Minutes or Hours: 10 Sec.
Place of sighting - State/County - City/Town - Country: Lafayette, LA. USA

Describe briefly the physical appearance of the object(s): Round light. Like a softball or basketball. Brighter than the moon. Whitish color with a little blue.

Describe briefly the location of your sighting: Outskirts of town. Fields to the left of highway. Some buildings around.

Where were you & what were you doing at the time: In the car driving on Hwy 167 north into Lafayette, LA. Was going to the store.

What made you first notice the object: Noticed a glowing ball hovering in the sky through the front windshield. Movement seemed abnormal.

What did you think the object was when you first saw it: Plane or helicopter.

Describe your reaction/action during and after the sighting: ____Excited, startled.

Describe the object and its actions: It was a round lighted object. Hovering. Moved to the right and then stopped. Took off to the left so fast it disappeared from view.

How did you lose sight of the Object: Disappeared because of extreme speed. Did not go behind anything.

Your real name & Age: Lisa 27 years old. 2nd witness: Jeremy 9yrs.

~Title: Southwest Miss ufo sighting
Keywords: ufo sightings miss daytime usa

This is a report on a ufo that I along with 2 other
individuals saw in clear daylight on the 2nd
Friday of October in 1988.

As most things that happen in life not much in the past
had prepared me for the event that happened on that Friday after noon.
As the story goes, it was a Friday evening around lunch in my home
town. I live in a small town in Southwest Miss buy the name of Natchez,
Old indian name. Its located approximately 90 miles north of Baton Rouge,
La.
on the Miss River. There are approximately 20,000 residents in the
community, basicly we are an agricultural community, there are some
plants, mostly
timber,oil,farming. There is a nuclear power plant north of
our town approx 23 miles.
My sighting happened in the other direction south of
town approx 25 miles as the crow flies.
It was the 2nd weekend of the Bow and Arrow hunting season for
Deer in Miss. Its something I've enjoyed since I was a teenager
and have hunted on this place since 7 yrs old.
That Friday I'd left Natchez and proceeded South on U.S. high-
way 61 to Woodville, Ms. Thats approx 35 miles south, then
you go west to a little town called Fort Adams, Ms. At that
point the blacktop ends and its gravel and dirt or mud for
another 17 miles to our hunting club.
You have to drive in almost a circle to get there because or
the smaller rivers and canals south of town.

That Friday was nothing special, just getting into the hunting
so to speak. I got to the camp kind of late, around 3:30 or
so in the afternoon. Decided to take a stand I had put in a tree
not far from the house on the river bank. I'd say approx 400
yards or so. The stand was in a bottle neck of trees that was
approx 100 yards from the river and approx 400 yards from the
house. BTW, the house and this land is in a low lying area

most would call it swamp land, although in years past they
have had excellent bean and cotton crops. That year there
were soybeans in front of the camp house. The camp house is
built on a 17 foot high mound of dirt. The old camphouse
burned down in a fire a couple years before. The older members decided
to do away with stilts and have the dirt mound constructed.

After I took the short ride to my stand area approx 300 yards
where I parked my 3 wheeler atc. I climed into the stand and sat
until approx 5:00. That particular day there had been a front
move through the area and left very low hanging clouds as an
overcast. It was solid cloud layer all up the river. I seem
to remember that you could see very clearly for miles looking

up the river. Something else that I noticed after the fact was
a young buck deer, a 3 pointer came by me about 75 yards between
me and the river on an old road bed. The deer was acting very
skiddish. I mean it was like the deer was frightned by someone
or something. It didnt strike me at first but later on It seemed
very odd. Like something was spooking that deer.
Well that was the only animal that I saw and around 5:00 ish got
down from the stand and walked the short distance to my atc.
It cranked instantly and I proceeded toward the camp.
As I was approaching the road to the camp I saw 2 other friends
drive buy on there atc bikes.

They were heading east, I was heading south away from the river.
The camphouse was east and south slightly from where we were.
The river was directly behind me and to the north.
At this stretch of the river it is almost east west in the main channel.
As I approached the road
I'd say I was 80 yards behind them when they passed by. It was a little
rough on my road and
was going slow.
Well as I turned onto the main camp road I traveled approx 30 or
so yards east. My 2 friends were about 100 yards or more up
in front of me, at this point.
All of a sudden my atc quit! I mean just quit! I'm sitting there
wondering what the heck, when I noticed my 2 friends up in front,
one was pointing toward something toward the river.

Then I saw it. It was very large,and very incredible.
My first take, was hey, thats that big
mother ship set from the movie Close Encounters of the 3rd Kind.
I was still wondering and looking down for a second or 2 at my
bike trying to figure out what the heck had happened to it.
I had just that day picked it up from the repair shop for a
tuneup and it was running perfect earlier.

Well I had to look back and wow, it hit me.
At first when I though it was a fake ship, I was thinking that
someone was moving it for a movie or something. Then I realized
there was nothing underneath it. It was REAL!

For anyone that has ever seen such a vessel, its truly
remarkable what happens to you! All those dreams and thoughts
about space ships and such come to reality!

Now in my own mind WOW, that thing was REAL!

It was approx 400 yards from us, moving like in a hoover going
westerly very slowly. Maybe 10-15 miles per hour. I remember
there was this very power humm sound emmulating from it.
Another thing was the lights, there were red,white,amber,green, and
bright blue. For some
reason the blue lights stuck in my
mind, I still dont know why. There also was this long object
attached to the I guess front of it. In plane english, it
looked like a boom of some type. It was I'd say approximately
1/3 or maybe even 1/2 as long as the vessel was wide.
On the end of the boom was a large taper up to what
appeared to be A U shapped fork.
The fork was up and down and had electricity
arking from tip to tip. This had to be the front
There were alot of other antennas and smaller booms
around it. I use booms to describe what I thought would
be simular to a large construction crane.
The vessel was circular in its appearance. It seemed to have a saucer
type appearance but was
much more involved.
In the upper middle section there seemed
to be lots of windows with amber lights comming from inside.

On several occasions I seemed to remember a couple sets of
large eyes looking at me. I'm not sure about that, but there
was something there. Its as if they were looking for me
or something or maybe they were sort of ideling along and just looking
around. I probably got a
telepathic message
but dont dont remember what. I do feel as though
I was contacted.
As it passed by it finally moved out of sight to the west in
behind the trees.

The area I saw it in was north of our camphouse and there is a
field that had at the time no appreciable timber there, it
had been killed by the flood waters from previous years and
you could see very clearly to the river. It was like looking
up a fire lane in some areas, only wider.

This entire event seemed to happen in slow motion. What was
actually 15-20 seconds seemed to last for hours.
Several days later I wondered about a dream I had something
but about those blue lights, and looking at my atc, and loss
of time but I'm still not sure about that part.

Well after it passed, it was still light, and I just
couldn't wait to tell someone and converse with my 2 friends

about it. I looked up the road, and they were driving on up
to the camp. I tried to crank my bike and it cranked instantly.
I drove to the kitchen door, shouting to my 2 friends, but
they had exited to there rooms out back. Anyway, I walked into
the kitchen, and I immediately see my Father and another old
friend of his across the room. I walked in and said Guess What?
I just saw a UFO!. Well the comment was like you want them
to know your crazy or something of the such.:-) I said if you
dont believe me ask my to friends.
He didnt want to hear anything about it. I said ok, Were is the
beer?
I walked to the frig, popped a bud and started to drink, and
wamm. Sonic boom hit the camp! Well we all rushed to the kitchen
door, which is on the east side of the building. Then one
after the other, jets, ours, I saw and counted 5. The first
one was a f-15 eagle, the rest were in different orders, seemed
liked an a-6, and what I think was a sr-71 blackbird,
and another f-15 and a f-14 tomcat. NOW, I'm sure that what I
had seen was real, the military was chasing it!
At this point I'll say that my dad is a retired navy pilot,
and an officer. He has flown jets and I soloed as a student
pilot the week I turned 16, Many years ago. I've read many
articles and learned alot of things about airplanes over my
life and feel very postive of these plane ids.
Looking back, its funny to see how trivial an sr-71 is after
seeing an object like the one I saw.

I'll stop at this point, but I will up info I've discovered
about this event after the fact at a later date.
I hope all of you who read this find it interesting, As I will
state on a stack of bibles it to be true to the best of my
memory.

Subject: A Further UFO Report from Scotland (fwd)
Date: Wed, 25 Jan 1995 21:33:02 -0500

Article in Aberdeen Evening Express, Friday 20 January 1995.

UFO SEEN AT BRIDGE OF DON

A Mystery object has been sighted flying across the night sky above
Aberdeen. Photo sales assistant Anne Marnie (42) was left rubbing her
eyes in disbelief after her early morning close encounter. She had gone
to her door at 3am to get one of her cats when she saw a bright, white
band of vapour in the sky above her Bridge of Don home. Stunned Anne,
Forvie Cresent, traced the vapour to it's source - a craft with two or
three lights which was travelling at speed. She said: "I couldn't
identify it. It wasn't a plane or helicopter. It also made a deep noise
which didn't sound like a plane. "I looked away for a few seconds, then
when I looked back it had disappeared. I can't describe or explain what
it was so to me it was an Unidentified Flying Object." Anne's experience

is the latest in a series of strange sightings in the North-east, including reports of a huge luminous cloud reported at Muchalls last year. A brother and sister claimed to have seen white lights, moving within it, going left and right, on and of. The latest sighting is unlikely to have been a plane landing at or leaving Aberdeen as the city airport closes at 10.30pm. City aviation expert Jim Ferguson says the object may have been a large plane flying across the North east en-route to another country. A vapour trail could be seen on a clear night if the moon was bright, he said. "In situations like this it could have been something like a 747 Jumbo flying at high levels between the Low Countries and the US," said Mr. Ferguson. A spokesman for the Civil Aviation Authority couldn't say whether a civilian aircraft would have been flying over the city at the time of the sighting. The Ministry of Defence says many reports of alleged UFO sightings are also proved to be natural phenomena. What do you think? Write to the Evening Express, Postbag, Lang Stracht, Mastrick, Aberdeen AB9 8AF, or fax your letter to 0224 699575.

Newsgroups: alt.ufo.reports
Subject: Big Explosion in McMinnville, Tennessee (fwd)
Date: Wed, 25 Jan 1995 21:36:12 -0500

The following is a transcription of a brief segment of the Laura Lee Show from KVI, Seattle. Laura is interviewing Peter Davenport of the National UFO Reporting Center. The date is Saturday, 14 January, 1995. Earlier, I mistakenly identified the guest as Michael Strenek of MUFON Canada. Sorry!

[This segment was preceded by discussion of a large number of sightings in Michigan]

PD. Actually, it [the Michigan incident] was a prelude to something that took place just a week ago tonight out in McMinnville, Tennessee. I took a report about 9:27 pm. last Saturday night from the Tennessee Emergency Management Agency. They’re based in Nashville. And interestingly, they had been directed by the US Air Force to the hotline out here in Seattle. Apparently - and you can rest, uh, more soundly tonight knowing that I apparently am the first line defense against exploding UFO’s, because last Saturday night, there apparently was an *immense* explosion very near McMinnville, Tennessee -- that’s in Warren County, just east of Nashville -- that caused the Warren County Sheriff’s Office to be activated, the Tennessee Emergency Management Agency to be activated, people were launching aircraft to look for the fragments or fires or injuries or property damage. It apparently was quite an explosion. I received a seven-page fax from the TEMA -- Tennessee Emergency Management Agency -- and I’ve had a number of phone calls from a number of people about this, and it certainly took place.

LL. Now, you were called because strange lights, explosions in

the sky -- but do you personally think it had something to do with a UFO, or couldn't it have been some other phenomenon? Someone set off a bomb, or a small meteor came down, uh, there's many causes of explosions.

PD. Uh, that's true -- a good point, and I skipped over part of the -- the -- the most important part of the story. The explosion occurred several minutes after the Warren County Sheriff's Office emergency dispatch was *swamped* with UFO calls. People were seeing saucers, they were seeing bat-like or triangular ships. And one of the objects that was seen descending to earth in Warren County, Tennessee, was a bright cylinder that was positioned vertically, that was seen by -- from many vantage points. I received a map showing the lines of sight from, uh, perceivers or witnesses to this event. Lines of sight from people who saw it. The object descended to the ground level, after which there was an *immense* explosion -- a white flash, and blue burning fragments of material were seen thrown high into the sky over McMinnville.

LL. Did you ask a scientist how do you get a blue burning fragment? I mean -- red hot, we know about. You can get blue flames or white flames, but blue flames, could you even guesstimate the temperature, therefore the kind of material used -- you can begin to piece these little facts together?

PD. You're full of good questions tonight, because that's the reason I said "blue burning fragments". Because exactly as you state, the temperature is a function -- er -- the, the incandescence, the color of the burning fragment is a result of its temperature. And the fact that it was blue makes it very mysterious. The, uh, I was told by TEMA that the airport manager of the McMinnville, Tennessee airport, after he saw the explosion, jumped in his own airplane, and took off, and searched the area for about six minutes, can't -- not believing his eyes that there wasn't some kind of visible damage or destruction or fire or something in process there.

LL. So, nobody found any damaged buildings, nobody found a hole in the ground, ah, um, nothing.

PD. That's my understanding.

LL. It was just -- and nobody found fragments.

PD. That's my understanding.

LL. You don't know if some government agency, or *somebody* came in. Or do you?

PD. Well, I do. And we've had -- we have a number of investigators to whom I have handed this information out in that area. As you know, the, the hotline here, the National UFO Reporting Center does not have its own investigators. All we are

is a clearing house for information. We take in reports and we try to turn that infromation around on short notice to investigators or interested parties -- ah, in this case, out in that area, that neck of the woods. And we've had a number of investigators skulking around Warren County trying to find out what's going on. The one thing we do know, uh, reasonably certainly at this point, is there have been some federal investigators circulating in that area -- we presume they're federal -- telling all of the authorities to say nothing about this event -- for what reason, I don't know, but it comes from a very, very good source.

LL. You never know, I guess, when the next Roswell will happen, and you never know when it's gonna happen in your own back yard, is that what you're trying to tell us here?

PD. Well I don't know. I may have seemed to have implied that, but it's only inadvertent, because frankly, I really don't know what happened there, except to say that the events that were described *before* the explosion apparently are very similar to what was reported just three or four days earlier out in the heart of Michigan. In point of fact, I took, six nights running, Laura, I took telephone calls all times of night and day, uh, about bat-like or delta-shaped ships. It started on the first of January that was my, uh, New Year's greeting.

[The discussion continues regarding sightings elsewhere]

Subject: Sighting in California Wilderness
Date: 26 Jan 1995 22:55:59 -0500

I was backpacking in the Big Bear Wilderness Area in California last August. My friend Robin and I were hiking to a lake, which I think was called Bull Run lake (or something close to that). It was a full moon and we were camped in a large meadow about 3 miles from the lake. The moon was so bright it was almost like daylight. We were sleeping outside of the tent, just in our

sleeping bags under the stars. I think I must have been dozing off when Robin yelled to me to look at the sky.

I looked up and we saw a formation of lights moving across the sky. They were moving incredibly fast, much faster than an airplane or helicopter or anything like that. They were shooting across the sky. I could see four off-white lights. They flew completely around us one time and then stopped and hovered over an area near the lake we were hiking too. Two of the lights stopped at the lake and two continued on and disappeared behind some mountains. The two lights still in view began bouncing all over the sky. They shot straight up and straight down. They went at diagnol angles. And all of this was extremely fast. So much faster than any modern aircraft I have ever seen. One other strange thing was that there was absolutely no noise. We were in a valley and even small noises echoed loudly. But it was perfectly still.

While we were watching the lights, Robin told me that a moment earlier the lights had been doing the same thing and one light had stopped and actually hovered
in place over the lake. Then a beam of light, colored red, yellow and white in sequence down the lenght of the beam, extended from the large light and went into the trees towards the lake. She said it was a thin beam, smaller than a spotlight. It stayed on the ground for a short time, less than a minute, and then retracted back into the larger, white light. Then the ships started flying around in circles and she had called my attention.

Robin and I were getting nervous. I was getting a tingly sensation in my neck. Robin suggested we leave the field. I thought it was kind of extreme, but as I thought about those lights, I got a little scared myself. The whole thing just felt wrong. So we took off back to the vehicle. It was only a 1/5 of a mile or so. But the walk seemed to take forever. We both felt kind of panicky by the time we reached the vehicle.

I slept poorly and had a dream of being chased by aliens. Now, I realize it is probably just a dream, but I will relay the details anyway. I don't remember much, but the strongest image I have is of a thin, bony, green arm reaching for me. I can see pale green fingers closing around my forearm. I have images of running through the woods in the dark in terror. It was a pretty disturbing dream.

The next day we returned to the field and grabbed our gear and did not ever hike to the lake. We both had very bad feelings about that idea. What do you think?

Subject: **TRANSCRIPTION OF MICHIGAN STATE POLICE REPORTS ON UFO SIGHTINGS
Followup-To: alt.paranet.ufo
Date: 28 Jan 1995 19:58:51 GMT

Here are transcriptions from the Michigan State Police reports that I obtained via the Freedom of Information Act. There has been a recent rash of sightings in Western and Northwestern Michigan in the past four months. It seems as if something major is transpiring. I called the parties involved in the sightings myself, and I spoke with the Michigan State trooper who also witnessed one

of the events. I can honestly say that these people are very credible, and very sure that what they saw was nothing they had ever seen before in their lives. I asked all of them if the sighting could have been planet Venus, or maybe a helicoptor or airplane, and their reaction was definitely very clear - that they witnessed some type of manufactured craft (either made by US government or extraterrestrial beings) that could not possibly be mistaken for a planet or natural phenomena. But you can read the police reports yourself and make your own decision.

Eric

**I WILL NOT GIVE THE NAMES, ADDRESSES, and PHONE NUMBERS OF THE COMPLAINANTS. I WISH TO RESPECT THEIR PRIVACY. CONTACT THE MICHIGAN STATE POLICE IN TRAVERSE CITY AND FILE A FREEDOM OF INFORMATION REQUEST TO OBTAIN THE POLICE REPORTS. EVERYTHING I AM ABOUT TO TYPE BELOW IS TRUE TO THE BEST OF MY KNOWLEDGE.

==========
MICHIGAN DEPARTMENT OF STATE POLICE
ORIGINAL INCIDENT REPORT

October 12, 1994
Time Received 7:00PM
Work Unit - Traverse City Post
County - Grand Traverse
Incident No. 71-3183-94
File Class 9800-7
Incident Status - (5) Closed

Nature of Incident: Reports a suspicious situation, spotted a U.F.O.

INFORMATION:
Complainant called to report that on Monday, Oct. 10, at 8:15pm he and two friends were on their way into Traverse City from Lake Ann area when they spotted a tri-angle shaped object in the sky to the South of them. He said they were on N. Long Lake Rd. in the vicinity of Straight Rd. and the object was off to the Southeast. The driver, (name witheld), age 22 stopped the pickup truck and all three got out to get a closer look. As they got out and watched the object, it sped off from it's hovering position in a lift off angle similar to a helicopter.

Complainant checked with the Traverse City FAA Tower to see if any such plane or balloon was in the area at that time of night, but the man at FAA said he was too busy to talk about such a thing and hung up.

INTERVIEW DRIVER OF VEHICLE:
Undersigned officer talked to (name witheld), who was the driver of the pickup truck that evening, and she related that she wasn't able to get a good look at the object as she was watching the road. She did stop and within moments of them getting out to see it hovering over the corn field it sped off.

The other passenger (name withheld), age 16 wasn't available to comment.

OBJECT IN THE SKY (U.F.O):

The object was described as tri-angle shaped object with the lower or bottom having blue lights emitting from it and shining downward. At the peak of the object it had a red beacon light. The strangest thing that (names withheld) both said about the object was that it lifted off without any roar or sound of any kind.

STATUS: CLOSED

MICHIGAN DEPARTMENT OF STATE POLICE
ORIGINAL INCIDENT REPORT

December 21, 1994
Time Received 7:30AM
Work Unit - Traverse City Post
County - Grand Traverse
Incident No. 071-4044-94
File Class 9900-9
Incident Status - (5) Closed

NATURE OF INCIDENT: Suspicious situation - UFO

LOCATION/TIME: location is above address located in sec. 28 of Paradise Twp., Grand Traverse Co., object was first observed at aprox. 6:30am date.

CONTACT COMPLAINANT:
undersigned met with comp. at the above location and was informed that the object was still visible. Officer went with comp. to her back porch and was pointed out a bright light in the sky, time was approx. 7:45am, clear skies. Upon looking at the light with binoculars, a cylindrical mass, possible gray in color was observed. On the underside of the object a large amount of individual lights were seen that appeared to be connected by a softer light running between them. At this time the officer asked comp. if she had a video camera. It was learned that she had just purchased one, however did not know how to work it, she advised that she called her neighbor, (name and address witheld) and he had been video tapeing the event.

Undersigned watched the object for approx. 20 minutes before it appeared to get further and further away. Object could still be seen when officer left the area. During this time it was noted that the object did not just stay level it could be observed rotating back and forth and at several times tipped vertically and then back down. Another smaller bright object could be seen just to the east of the larger object, however no shape or color could be seen just a bright light.

INTERVIEW COMP:
it was learned that at approx. 6:30am comp. opened the door to let her dogs out when she first observed something in the sky, as she watched it it appeared to fall straight down to a height of just over the tree tops near her storage barn. When asked about the size she advised that it was approx. 3 times the size of her barn (approx 60 ft. in diameter). She stated that she observed the white and blue lights at this time and there appeared to be a haze around it. Comp. stated that she stuck her head outside and was surprised that she heard no sound coming from the object.

At approx. 7:00am she called her neighbor listed above and requested that he video tape the events. Comp. stated that around Thanksgiving time she observed another event from her home. She stated that the object was further away and higher up than this time, however, she could still make out the lights, she stated that she did not call that time as she was afraid everyone would think she was nuts.

CONTACT (NAME WITHELD):
Undersigned contacted (name witheld) and learned that he had video taped the events. He stated that (name witheld) had called at approx. 7:00am and told him about the object and requested that he tape it. He got up and got dressed, went out on the porch and started taping it. (name witheld) stated that it was well up in the air when he first saw it and started taping. (name witheld) gave undersigned the tape to make copies of, the original to be returned to him.

ADDITIONAL OBSERVATIONS:
It should be noted that at approx. 7:50am three military type aircraft flew through the area, as each aircraft approached the object the lights went off and then back on as the plane passed.

CONTACT MINN. AIR TRAFFIC CONTROL CENTER:
a check was made and learned that during peace time they do not have a man watching the consol at all times. It was learned that the three aircraft described above were picked up on the radar, however, they were transponding signals which helps the radar pick it up. It was learned that on object in the air that was not sending out signals would be hard to be noted.

ADDITIONAL COMP: 71-3183-94 taken 10-12-94 attached
STATUS: closed

SUPPLEMENTAL INCIDENT REPORT:
Incident Number: 071-4044-94
Supplemental Date: 1-10-95
Original Date: 12-21-1994
File Class: 9900-0

INFORMATION: this comp. is re-opened to clear up confusion on the ownership of the video tape.

DISPOSITION of the VIDEO TAPE:
on 12-21-94 undersigned brought the original tape to the post to make a copy for the National UFO Reporting Center. While at the post TV9&10 took pictures of the tape as it was playing on the VCR. The original tape was taken back to the comp. as per prior arrangements with the owner of the tape.

The copy is being sent to the National UFO Reporting Center in Seattle, Wash.

****

Subject: Near miss

Below is a report from the Manchester Evening News dated Friday 27th January 1995.

Headline :- Ringway jet in UFO terror

A BRIGHTLY-lit UFO suddenly appeared in front of a British Airways' plane flying to Ringway.

The two terrified BA pilots, fearing a disaster, ducked in the cockpit of the Boeing 737 with 60 people on board, which at the time was at 13,000 feet above the Pennines approaching Manchester.

Captain Roger Wills, who was in command of the flight from Milan, and first officer Mark Stuart, have made reports to the Civil Aviation Authority and a top-level inquiry is underway today.

The pilots said in their reports that they saw a "triangular-shaped flying object" in front of their plane.

They immediately checked with air traffic control at Ringway, and were told there was nothing on the radar other than their own aircraft. The pilots then saw the UFO travel at great speed down the right hand side of their own airliner.

Highly-experienced Captain Wills and first officer Stuart, 24, did not initially report what they had seen, as they feared being ridiculed by their colleagues.

But the BA management was informed, and following set procedures, reports with sketches have been sent to the Joint Air Miss Working Group, which is part of the CAA. Both pilots refused to speak to the Manchester Evening News, but one of their colleagues said: "They are high-grade, sensible guys".

"Everyone's talking about what they saw and it is right that it is reported, so the experts can try to establish what it was".

Despite the drama, which the passengers knew nothing about, the plane landed safely at Ringway at 7pm on January 6.

>Newsgroups: alt.ufo.reports
>Subject: Non Illuminated Triangles
>Date: 21 Jan 1995 16:27:49 -0700

Lets try this again. Sorry all but I posted this earlier when I was having some problems and none of the text showed up. I beleive It will come through now.
Anyway, I would like to ask if anyone has ever seen or might know about an object I have seen on two seperate occasions. The first time was probably about fifteen years when me and a couple of friends saw a

V-shape formation of objects (5-7 of them) fly over head at what appeared to be an incredible speed. These objects didn't seem to have any illumination except for the lights from the city reflecting off the bottom of them. They appeared to be a dullish metallic color with a slight tinge of green. It was hard to judge their altitude or speed,but I would guess that they were maybe 300-500 feet up and they went from being directly overhead when we first noticed them to being gone from sight in about three seconds. They were all the same size and shape which was circular with small rounded swept wings and they didn't make a sound as they flew by. The second time I saw this object was about four years ago, only this time there was only one of them. I saw it with my wife and sister but only my wife got a good look at it, as my sister couldn't locate it in the sky. Again it was not illuminated, very fast and made no sound. This time it appeared to be higher up and harder to spot. I live in Edmonton Alberta Canada (Pop. 600,000) and we did have a military air base just outside of town.(Closed recently) Although if they were anything military I would guess that they came from C.F.B Cold Lake which is a few hundred miles north of here and also where the U.S. cruise missile testing was being done. Any input would be appreciated.
